ACKNOWLEDGEMENT

The author would like to express his most profound and sincere gratitude to his supervisor, Dr. Methi Ekasingh, for his valuable assistance during the complex and tedious task of conducting the experiment and processing of manuscript.

It is also a pleasure to acknowledge the help of his committee members, Assist. Prof. Dr. Aree Wiboonpongse, Mr. Sawatdee Boonchee and Assist. Prof. Chavalit Chalothorn whose valuable advice and constructive criticisms had made his research output more readable and sensible.

Deepest appreciation, gratitude and respect are also due to Mr. Rewat Chirasathaworn, Don Romulo C. Del Castillo, Ellen R. Pantollana for their perspicacious interest and trustworthy suggestions which were constant sources of encouragement of the author.

Thanks are also extended to Mr. Praveit Yophanutsak, Mr. Pheeranit Kaewtamajai, for their help in the field work and data management.

Members of his examining committee provided more help than what he had expected.

Good research ideas for this topic cannot be conducted without monetary expense. So, his special gratitudes are also given to the donors, Ford Foundation and the Southeast Asian Universities Agroecosystem Network (SUAN).

His special thank goes to his wife, Pranorm. Her forbearance, her help both in the field and in preparing the report, her encouragement and advice, and her endurance were invaluable to him and to the study.
