ACKNOWLEDGMENTS

It is a pleasure to acknowledge the help of many people and institutions in the completion of this research.

My sincere thanks go to Dr. Benjavan Rerkasem, my academic and thesis advisor and chairman of my examining committee, Dr. Kanok Rerkasem, Mr. Songchao Insomphun, and Mr. Phrek Gypmantasiri, committee members, for their valuable advices and cooperation.

Staff members and colleagues of the Agricultural Systems Program provided various forms of assistance too many to recount. In particular, my deep gratitude goes to Dean Nakorn Nalampang, Mr. Phrek Gypmantasiri, and Dr. Methi Ekasingh; my classmates of Class 1989, especially Anang and Suporn; students of Class 1988 particularly Tony, Panya, Nguyen Ngoc De, Pocharawan, and Pornwilai. It's also worthy to mention Khun Nuansri and Khun Pong for facilitating needed documents and other paperworks; Ajarn Walailak Unachak for her wholesome Thai lessons; and also Khun Jamlong and Khun Sittichai for their assistance in field and laboratory work.

Major support came from the FORD Foundation. The Australian Center for International Agricultural Research (Project 8800) and Xavier University also provided additional support for the completion of this research.

I would also like to express my profound thanks to Dr. M. B. Peoples and Dr. D. F. Herridge for their technical advices on the measurement of nitrogen fixation.

Other friends provided candid cooperation, Tony and Lorna, Boonchop, Bijaya, Bu, Tita, and Don, to name but a few.

In the Philippines, the College of Agriculture, Xavier University also provided valuable support. A special word of thanks to Fr. A. J. Ledesma, S.J., Dean of the College of Agriculture, Ma'am T. A. Zablan, Dr. F. Aclan, Engr. L. G. Tabil and friends, and to the Longgong Connection.

On a more personal note, my stay in Thailand was made more enjoyable and memorable by the camaraderie provided by V. Nimmanahaeminda and family, Elauria family, Boonchop, Kong, A. Or, Joy, Games, Feli, and many others... I have almost taken for granted the never-ending support and understanding of my "Tay Juan" and "Nay Osang" and other members of the family...

To all of you, "khap khun mac kha!"

Ellen R. Pantollana
