ACKNOWLEDGEMENTS	iii
ABSTRACT (ENGLISH)	iv
ABSTRACT (THAI)	vii
TABLE OF CONTENTS	x
LIST OF TABLES	xiii
LIST OF FIGURES	xviii
CHAPTER 1 INTRODUCTION	1
1.1 Principles, rationale and hypothesis	1
1.2 Research objectives	3
1.3 Research scope	3
1.4 Usefulness of the research	3
1.5 Research locations	4
CHAPTER 2 LITERATURE REVIEW	5
2.1 Introduction	5
2.2 Citrus anatomy and biology	5
2.3 Mandarins or tangerines	6
2.4 Citrus fruit physiology and biochemistry	7
2.5 Postharvest and preparation for market of tangerine fruit	18
2.6 Coating application	21
2.7 Coating materials for fruit and vegetables	24
2.8 Mechanism of fruit coating	34
2.9 Coating materials for citrus fruit	39
CHAPTER 3 MATERIALS AND METHODS	45
3.1 Fruit samples	45
3.2 Experiment	45

3.3 Coating application	56
3.3.1 Manual method	56
3.3.2 Commercial practice in packing house	57
3.4 Quality evaluation	58
CHAPTER 4 RESULTS	66
4.1 Effects of commercial coatings, polyethylene microemulsion and chitosan on the physico-chemical and physiological characters of tangerine fruit	66
4.1.1 Effects of commercial coatings, polyethylene microemulsion and chitosan on the physico-chemical and physiological characters of tangerine fruit during storage at room temperature	66
4.1.2 Effect of storage temperatures and coating materials on the physico-chemical and physiological characters of tangerine fruit	82
4.2 Effect of commercial coatings by commercial method on the physico-chemical and physiological characters of tangerine fruit	110
4.2.1 Effect of commercial coatings by commercial method on the physico-chemical and physiological characters of tangerine fruit during storage at room temperature	110
4.2.2 Effect of commercial coatings on the physico-chemical and physiological characters of tangerine fruit during storage at 5°C	123
4.3 Screening of developed coating materials for tangerine fruit cv. ‘Sai Nam Phueng’	136
4.4 Effect of 4 developed coating materials and commercial coating (Zivdar) on the physico-chemical and physiological characters of tangerine fruit	165
4.5 Correlation between study variables	181
4.6 Scanning electron microscope (SEM) observation and permeability of coatings	183
4.6.1 Scanning electron microscope (SEM) observation	183
4.6.2 Permeability of coatings	189

CHAPTER 5 DISCUSSION	191
5.1 Effect of coating materials and storage temperatures on the physico-chemical and physiological characters of tangerine fruit	191
5.2 Correlation between study variables	222
5.3 Scanning electron microscope (SEM) observation and permeability of coatings	223
5.3.1 Scanning electron microscope (SEM) observation	223
5.3.2 Permeability of coatings	224
CHAPTER 6 CONCLUSIONS	227
BIBLIOGRAPHY	229
APPENDIX	260
PUBLICATIONS	351
CURRICULUM VITAE	353

LIST OF TABLES

Table	Page
3.1 Coating materials, main components, and their sources	47
3.2 Chemicals for preparation of coating materials	48
3.3 Compositions and preparations of the coating materials in experiment 3	49
3.4 Groups of coating materials in experiment 3	51
3.5 Compositions and preparations of the developed coating materials in experiment 4	55
4.1 Weight loss, gloss, internal O ₂ and internal CO ₂ of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at room temperature (23±3°C) and 56±5% relative humidity for 7 days	68
4.2 Respiration rate, ethanol content in juice and alcohol dehydrogenase activity of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at room temperature (23±3°C) and 56±5% relative humidity for 7 days	70
4.3 Flavor score, visual appearance score and peel color of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at room temperature (23±3°C) and 56±5% relative humidity for 7 days	74
4.4 Total soluble solids (TSS), titratable acidity (TA), TSS/TA ratio, pH and vitamin C of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at room temperature (23±3°C) and 56±5% relative humidity for 7 days	79
4.5 Weight loss, internal O ₂ , internal CO ₂ , ethanol content and alcohol dehydrogenase activity of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at 5, 10°C and room temperature for 10 days	84

- 4.6 Flavor score, visual appearance score and peel color of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at 5, 10°C and room temperature for 10 days 91
- 4.7 Total soluble solids (TSS), titratable acidity (TA), TSS/TA ratio, pH and vitamin C content of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at 5, 10°C and room temperature for 10 days 104
- 4.8 Weight loss, internal O₂, internal CO₂ and ethanol content in juice of tangerine fruit cv. 'Sai Nam Phueng' coated with 3 commercial coatings by commercial method during storage at room temperature (24±3°C) and 59±6% relative humidity for 10 days 110
- 4.9 Pyruvate decarboxylase activity and alcohol dehydrogenase activity of tangerine fruit cv. 'Sai Nam Phueng' coated with 3 commercial coatings by commercial method during storage at room temperature (24±3°C) and 59±6% relative humidity for 10 days 114
- 4.10 Flavor score, visual appearance score and peel color of tangerine fruit cv. 'Sai Nam Phueng' coated with 3 commercial coatings by commercial method during storage at room temperature (24±3°C) and 59±6% relative humidity for 10 days 116
- 4.11 Total soluble solids (TSS), titratable acidity (TA), TSS/TA ratio, pH and vitamin C content of tangerine fruit cv. 'Sai Nam Phueng' coated with 3 commercial coatings by commercial method during storage at room temperature (24±3°C) and 59±6% relative humidity for 10 days 120
- 4.12 Weight loss, internal O₂, internal CO₂ and ethanol content in juice of tangerine fruit cv. 'Sai Nam Phueng' coated with commercial coatings by commercial method during storage at 5±2°C and 85±3% relative humidity for 41 days 124

- 4.13 Pyruvate decarboxylase activity and alcohol dehydrogenase activity of tangerine fruit cv. 'Sai Nam Phueng' coated with commercial coatings by commercial method during storage at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 41 days 127
- 4.14 Flavor score, visual appearance score and peel color of tangerine fruit cv. 'Sai Nam Phueng' coated with commercial coatings by commercial method during storage at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 41 days 129
- 4.15 Total soluble solids (TSS), titratable acidity (TA), TSS/TA ratio, pH and vitamin C content of tangerine fruit cv. 'Sai Nam Phueng' coated with commercial coatings by commercial method during storage at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 41 days 133
- 4.16 Weight loss of tangerine fruit coated with developed coatings (Group A) during storage at room temperature ($24\pm 3^{\circ}\text{C}$) and $74\pm 7\%$ relative humidity for 12 days 142
- 4.17 Weight loss of tangerine fruit coated with developed coatings (Group B) during storage at room temperature ($21\pm 3^{\circ}\text{C}$) and $72\pm 6\%$ relative humidity for 15 days 143
- 4.18 Weight loss of tangerine fruit coated with developed coatings (Group C) during storage at room temperature ($22\pm 3^{\circ}\text{C}$) and $73\pm 6\%$ relative humidity for 15 days 144
- 4.19 Weight loss of tangerine fruit coated with developed coatings (Group D) during storage at room temperature ($20\pm 4^{\circ}\text{C}$) and $67\pm 7\%$ relative humidity for 12 days 145
- 4.20 Weight loss of tangerine fruit coated with developed coatings (Group E) during storage at room temperature ($27\pm 4^{\circ}\text{C}$) and $57\pm 8\%$ relative humidity for 9 days 146
- 4.21 Flavor score of tangerine fruit coated with developed coatings (Group A) during storage at room temperature ($24\pm 3^{\circ}\text{C}$) and $74\pm 7\%$ relative humidity for 12 days 148

4.22	Flavor score of tangerine fruit coated with developed coatings (Group B) during storage at room temperature ($21\pm 3^{\circ}\text{C}$) and $72\pm 6\%$ relative humidity for 15 days	149
4.23	Flavor score of tangerine fruit coated with developed coatings (Group C) during storage at room temperature ($22\pm 3^{\circ}\text{C}$) and $73\pm 6\%$ relative humidity for 15 days	150
4.24	Flavor score of tangerine fruit coated with developed coatings (Group D) during storage at room temperature ($20\pm 4^{\circ}\text{C}$) and $67\pm 7\%$ relative humidity for 12 days	151
4.25	Flavor score of tangerine fruit coated with developed coatings (Group E) during storage at room temperature ($27\pm 4^{\circ}\text{C}$) and $57\pm 8\%$ relative humidity for 9 days	152
4.26	Visual appearance score of tangerine fruit coated with developed coatings (Group A) during storage at room temperature ($24\pm 3^{\circ}\text{C}$) and $74\pm 7\%$ relative humidity for 12 days	154
4.27	Visual appearance score of tangerine fruit coated with developed coatings (Group B) during storage at room temperature ($21\pm 3^{\circ}\text{C}$) and $72\pm 6\%$ relative humidity for 15 days	155
4.28	Visual appearance score of tangerine fruit coated with developed coatings (Group C) during storage at room temperature ($22\pm 3^{\circ}\text{C}$) and $73\pm 6\%$ relative humidity for 15 days	156
4.29	Visual appearance score of tangerine fruit coated with developed coatings (Group D) during storage at room temperature ($20\pm 4^{\circ}\text{C}$) and $67\pm 7\%$ relative humidity for 12 days	157
4.30	Visual appearance score of tangerine fruit coated with developed coatings (Group E) during storage at room temperature ($27\pm 4^{\circ}\text{C}$) and $57\pm 8\%$ relative humidity for 9 days	158
4.31	Weight loss, internal O_2 , internal CO_2 , acetaldehyde and ethanol content in juice of tangerine fruit cv. 'Sai Nam Phueng' coated with 4 developed coatings and Zivdar during storage at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 11 days	166

4.32	Pyruvate decarboxylase activity and alcohol dehydrogenase activity of tangerine fruit cv. 'Sai Nam Phueng' coated with 4 developed coatings and Zivdar during storage at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 11 days	170
4.33	Flavor score, visual appearance score and peel color of tangerine fruit cv. 'Sai Nam Phueng' coated with 4 developed coatings and Zivdar during storage at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 11 days	173
4.34	Total soluble solids (TSS), titratable acidity (TA), TSS/TA ratio, pH and vitamin C content of tangerine fruit cv. 'Sai Nam Phueng' coated with 4 developed coatings and Zivdar during storage at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 11 days	179
4.35	Comparison of oxygen permeabilities between developed coating and commercial coating on the cast polypropylene film (CCP film)	190
4.36	Comparison of water vapor permeabilities between developed coating and commercial coating on the kraft paper	190

LIST OF FIGURES

Figure	Page
3.1 Characteristics of 6 developed coating materials (Group A) in experiment 3	52
3.2 Characteristics of 6 developed coating materials (Group B) in experiment 3	53
3.3 Characteristics of 6 developed coating materials (Group C) in experiment 3	53
3.4 Characteristics of 8 developed coating materials (Group D) in experiment 3	54
3.5 Characteristics of 9 developed coating materials (Group E) in experiment 3	54
3.6 Characteristics of 4 developed coating materials and Zivdar that provide in experiment 4	56
3.7 Coating application by manual method	57
3.8 Appearance of coated tangerine fruit with coating materials and non-coated fruit	57
3.9 Cleaning and coating application by commercial method	58
3.10 Micro-TRI-gloss reflectance meter (BYK Gardner Inc., MD, USA)	58
3.11 Representation of a color solid for L* a* b* color space (Minolta, 1994)	62
4.1 Effects of coating materials on the weight loss of tangerine fruit stored at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 13 days	67
4.2 Effects of coating materials on the (A) internal O_2 concentration, (B) internal CO_2 concentration and (C) respiration rate of tangerine fruit stored at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 13 days	69

- 4.3 Effects of coating materials on the ethanol content in juice of tangerine fruit stored at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 7 days 71
- 4.4 Effects of coating materials on the alcohol dehydrogenase activity of tangerine fruit stored at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 13 days 72
- 4.5 Effects of coating materials on the (A) flavor score and (B) visual appearance score of tangerine fruit stored at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 13 days 75
- 4.6 Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 0, 7 and 13 days 76
- 4.7 Effects of coating materials on the (A) L^* , (B) chroma and (C) hue angle of tangerine fruit stored at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 13 days 77
- 4.8 Effects of coating materials on the (A) total soluble solids, (B) titratable acidity and (C) TSS/TA ratio of tangerine fruit stored at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 13 days 80
- 4.9 Effects of coating materials on the (A) pH and (B) vitamin C of tangerine fruit stored at room temperature ($23\pm 3^{\circ}\text{C}$) and $56\pm 5\%$ relative humidity for 13 days 81
- 4.10 Effects of coating materials on the weight loss of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively 83
- 4.11 Effects of coating materials on the internal O_2 of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively 85
- 4.12 Effects of coating materials on the internal CO_2 of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively 87

4.13	Effects of coating materials on the ethanol content in juice of tangerine fruit stored at 5, 10°C and room temperature for 10 days	88
4.14	Effects of coating materials on the alcohol dehydrogenase activity of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively	90
4.15	Effects of coating materials on the flavor score of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively	92
4.16	Effects of coating materials on the visual appearance score of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively	94
4.17	Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at 5, 10°C and room temperature on day 0	95
4.18	Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at 5, 10°C and room temperature for 10 days	96
4.19	Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at 5 and 10°C for 25 days	97
4.20	Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with coating materials during storage at 5°C for 43 days	97
4.21	Effects of coating materials on the L* of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively	99
4.22	Effects of coating materials on the chroma of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively	100
4.23	Effects of coating materials on the hue angle of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively	101

- 4.24 Effects of coating materials on the total soluble solids of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively 105
- 4.25 Effects of coating materials on the titratable acidity of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively 106
- 4.26 Effects of coating materials on the TSS/TA ratio of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively 107
- 4.27 Effects of coating materials on the pH of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively 108
- 4.28 Effects of coating materials on the vitamin C of tangerine fruit stored at 5, 10°C and room temperature for 43, 25 and 10 days, respectively 109
- 4.29 Effects of 3 commercial coatings on the weight loss of tangerine fruit stored at room temperature ($24\pm 3^{\circ}\text{C}$) and $59\pm 6\%$ relative humidity for 10 days 111
- 4.30 Effects of 3 commercial coatings on the (A) internal O_2 , (B) internal CO_2 and (C) ethanol content of tangerine fruit stored at room temperature ($24\pm 3^{\circ}\text{C}$) and $59\pm 6\%$ relative humidity for 13 and 12 days 112
- 4.31 Effects of 3 commercial coatings on the (A) pyruvate decarboxylase activity and (B) alcohol dehydrogenase activity of tangerine fruit stored at room temperature ($24\pm 3^{\circ}\text{C}$) and $59\pm 6\%$ relative humidity for 13 days 115
- 4.32 Effects of 3 commercial coatings on the (A) flavor score and (B) visual appearance score of tangerine fruit stored at room temperature ($24\pm 3^{\circ}\text{C}$) and $59\pm 6\%$ relative humidity for 13 days 117
- 4.33 Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with 3 commercial coatings during storage at room temperature ($24\pm 3^{\circ}\text{C}$) and $59\pm 6\%$ relative humidity for 0 and 10 days 118

4.34	Effects of 3 commercial coatings on the (A) L*, (B) chroma and (C) hue angle of tangerine fruit stored at room temperature ($24\pm 3^{\circ}\text{C}$) and $59\pm 6\%$ relative humidity for 13 days	119
4.35	Effects of 3 commercial coatings on the (A) total soluble solids, (B) titratable acidity and (C) TSS/TA ratio of tangerine fruit stored at room temperature ($24\pm 3^{\circ}\text{C}$) and $59\pm 6\%$ relative humidity for 13 days	121
4.36	Effects of 3 commercial coatings on the (A) pH and (B) vitamin C of tangerine fruit stored at room temperature ($24\pm 3^{\circ}\text{C}$) and $59\pm 6\%$ relative humidity for 13 days	122
4.37	Effects of 3 commercial coatings on the weight loss of tangerine fruit stored at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 46 days	124
4.38	Effects of 3 commercial coatings on the (A) internal O_2 , (B) internal CO_2 and (C) ethanol content of tangerine fruit stored at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 46 and 41 days, respectively	125
4.39	Effects of 3 commercial coatings on the (A) pyruvate decarboxylase activity and (B) alcohol dehydrogenase activity of tangerine fruit stored at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 46 days	127
4.40	Effects of 3 commercial coatings on the (A) flavor score and (B) visual appearance score of tangerine fruit stored at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 46 days	130
4.41	Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with 3 commercial coatings during storage at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 0, 21 and 41 days	131
4.42	Effects of 3 commercial coatings on the (A) L*, (B) chroma and (C) hue angle of tangerine fruit stored at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 46 days	132

4.43	Effects of 3 commercial coatings on the (A) total soluble solids, (B) titratable acidity and (C) TSS/TA ratio of tangerine fruit stored at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 46 days	134
4.44	Effects of 3 commercial coatings on the (A) pH and (B) vitamin C of tangerine fruit stored at $5\pm 2^{\circ}\text{C}$ and $85\pm 3\%$ relative humidity for 46 days	135
4.45	Effects of developed coatings (A) group A, (B) group B, (C) group C, (D) group D and (E) group E on the weight loss of tangerine fruit stored at room temperature	147
4.46	Effects of development coatings (A) group A, (B) group B, (C) group C, (D) group D and (E) group E on the flavor score of tangerine fruit stored at room temperature	153
4.47	Effects of developed coatings (A) group A, (B) group B, (C) group C, (D) group D and (E) group E on the visual appearance score of tangerine fruit stored at room temperature	159
4.48	Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with developed coatings (Group A) during storage at room temperature ($24\pm 3^{\circ}\text{C}$) and $74\pm 7\%$ relative humidity for 0, 6 and 12 days	160
4.49	Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with developed coatings (Group B) during storage at room temperature ($21\pm 3^{\circ}\text{C}$) and $72\pm 6\%$ relative humidity for 0, 8 and 15 days	161
4.50	Visual appearance score of tangerine fruit cv. Sai 'Nam Phueng' coated with developed coatings (Group C) during storage at room temperature ($22\pm 3^{\circ}\text{C}$) and $73\pm 6\%$ relative humidity for 0, 8 and 15 days	162
4.51	Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with developed coatings (Group D) during storage at room temperature ($20\pm 4^{\circ}\text{C}$) and $67\pm 7\%$ relative humidity for 0, 6 and 12 days	163

- 4.52 Visual appearance score of tangerine fruit cv. 'Sai Nam Phueng' coated with developed coatings (Group E) during storage at room temperature ($27\pm 4^{\circ}\text{C}$) and $57\pm 8\%$ relative humidity for 0, 5 and 9 days 164
- 4.53 Effects of 4 developed coating materials and Zivdar on the weight loss of tangerine fruit stored at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 13 days 167
- 4.54 Effects of 4 developed coating materials and Zivdar on the (A) internal O_2 , (B) internal CO_2 and (C) ethanol content of tangerine fruit stored at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 13 and 11 days, respectively 169
- 4.55 Effects of 4 developed coating materials and Zivdar on the (A) pyruvate decarboxylase activity and (B) alcohol dehydrogenase activity of tangerine fruit stored at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 13 days 171
- 4.56 Effects of 4 developed coatings and Zivdar on the (A) flavor score and (B) visual appearance score of tangerine fruit stored at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 13 days 174
- 4.57 Visual appearance of tangerine fruit cv. 'Sai Nam Phueng' coated with 4 developed coating materials and Zivdar during storage at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 0, 7 and 13 days 175
- 4.58 Effects of 4 developed coating materials and Zivdar on the (A) L^* , (B) chroma and (C) hue angle of tangerine fruit stored at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 13 days 177
- 4.59 Effects of 4 developed coating materials and Zivdar on the (A) total soluble solids, (B) titratable acidity and (C) TSS/TA ratio of tangerine fruit stored at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 13 days 180

- 4.60 Effects of 4 developed coatings and Zivdar on the (A) pH and (B) vitamin C of tangerine fruit stored at room temperature ($27\pm 3^{\circ}\text{C}$) and $56\pm 11\%$ relative humidity for 13 days 181
- 4.61 Correlation between internal O_2 -ethanol content (A), internal CO_2 -ethanol content (B) and internal O_2 -internal CO_2 (C), combined results of experiment 4.2.1 and 4.4 182
- 4.62 SEM images of the tangerine fruit surface (A-1, A-2) coated with Citrashine ($\times 150$, $\times 500$), (B-1, B-2) coated with Sealkote ($\times 150$, $\times 500$), (C-1, C-2) coated with Fomesa ($\times 150$, $\times 500$) and (D-1, D-2) coated with Rosy Plus ($\times 150$, $\times 500$) 184
- 4.63 SEM images of the (A) stomata and wax platelets on the surface of non-coated fruit ($\times 500$) and (B) a stoma on the surface of non-coated fruit ($\times 2,000$) 187
- 4.64 SEM images of the tangerine fruit surface (A-1, A-2) coated with formulation A ($\times 200$, $\times 500$), (B-1, B-2) coated with formulation B ($\times 200$, $\times 500$) and (C-1, C-2) coated with formulation C ($\times 200$, $\times 500$) 188
