## ACKNOWLEDGEMENTS

So many people have helped me in all kinds of ways, making this thesis possible. I would like to take a moment to acknowledge them. My advisors, Dr Daruni Naphrom, Dr Jens Wünsche, and Dr. Choochad Santasup did a lot to help me in laying out the research, questions I had throughout the research, and spent many hours revising my writing. A special thanks to Dr. Abram Bicksler, who was involved throughout my research, providing great advice, motivation, editing, and statistical expertise. Thanks for everything. I am enormously grateful. The Fiat Panis Foundation and CMU graduate school provided me with scholarship, enabling me to study and do my research in Thailand. Puifai Pinthukas, our extremely helpful program coordinator, helped in so many ways to navigate through the administration. Ajarn Rick Burnette was a great encouragement, support and valuable source of information for my research, in addition to offering a number of rides up to Fang. Thank you CMU, ECHO, UHDP and Partners Relief and Development for partnering with me, allowing me to use your bananas and facilities. In particular thanks to P'Chai for his assistance in digging and treating bananas and helping record data. Thanks to all the ECHO and UHDP staff and interns for keeping me happy and fed on my many trips up to Fang. My family has also been incredibly supportive in my studying, motivating me to complete my research in record time. And lastly, but most importantly, I thank my Lord for keeping His promise to never leave me.

Elizabeth Langford
