ACKNOWLEDGEMENT

I wish to express my deep gratitude to my advisor as well as the chairman of the thesis Lect. Dr. Kesinee Gatphayak for her excellent guidance and suggestion. I would like to express the appreciation to my super advisor Assoc. Prof. Dr. Therdchai Vearasilp, who gives the valuable advice and support throughout my graduate study.

I am extremely grateful to Prof. Dr. Bertram Brenig and Prof. Dr. Christoph Knorr for an opportunity to perform this thesis at the Institute of Veterinary Medicine (IVM) in Göttingen, Germany. I thank for suggestion, recommendation and kind help. I would like to extend my appreciation to the DAAD for offering me financial support. My sincere appreciation goes to Prof. Dr. Udo ter Meulen and to Prof. Dr. Gabriele Hörstgen-Schwark.

I am highly thankful to the thesis examining committee, Asst. Prof. Dr. Buncha Pongpisantham for advice, comment and constructive suggestions.

I especially want to express my sincere gratitude to Mrs. Ratchaneewan Wongprachan, Department of Mathematics and Statistics, Maejo University for statistical analyses. I also thank Post-Harvest institute for laboratory supported.

I want to thank Miss Viola Raupach for her excellent technical assistance, Mr. Christian Beuermann, Miss Jule Beck, Miss Monique Germerodt, Miss Maria Hansen, Mr. Rifat Morina, Mr. N.S. Ding and all laboratory staff of the IVM for their friendship and support.

I would like to thank Miss Sangtiwa Suriyong, Mr. Amphon Warittitum and Mr. Rangsun Charoensook. Thanks my friends, Mr. Suphachai Chotiwan, Mr. Pipat Tanakit, Mr. Nattee Mechamna, Mr. Chainarong Thipjai, who always share knowledge, fun and happiness together.

Finally, but much appreciation specially expressed to my family for their loves, and support throughout my life.

Watchara Laenoi
