Abstract (Thai)	v
Abstract (English)	vii
Table of contents	ix
List of tables	xvi
List of figures	xxi
List of appendices	xxii
List of Abbreviations	xxiii
Chapter I Introduction	1
1.1 Statement of the problem	1
1.2 Rationale of the study	4
1.3 Objectives	4
1.4 Usefulness of the study	5
1.5 Scope of the study	6
Chapter II Review of literature	7
2.1 Sustainable development	7
2.2 Sustainable agriculture	8
2.3 Sustainable assessment	9
2.3.1 Sustainability indicators	9

2.3.2	Normalization of indicators	11
2.3.3	Aggregation of indicators	13
2.4	Analytical hierarchy process (AHP)	14
2.4.1	Analytic hierarchy process (AHP) as decision making tool	14
2.4.2	The AHP process	15
2.4.2.1	Assigning the pair wise comparison values	16
2.4.2.2	Weight computation	18
2.4.2.3	Checking consistency	19
2.5	Comparisons of drip irrigation and surface irrigation	20
2.6	Drip irrigation and banana cultivation	21
Chapter III	Research Method	24
3.1	Research procedures	24
3.2	Sustainability indicator	26
3.2.1	Socioeconomic sustainability	26
3.2.1.1	Water productivity	26
3.2.1.2	Annual net profit from unit banana lands	28
3.2.1.3	Income variation of banana field	29
3.2.1.4	Farmer social participation	30
3.2.2	Ecological sustainability	31
3.2.2.1	Amount of inorganic fertilizer used for unit banana land during a year	31

3.2.2.2	Amount of agrochemical used for unit banana land during a year	32
3.2.2.3	Soil salinity level in the banana field	33
3.2.3	Agronomical sustainability	33
3.2.3.1	Weed infestation of banana field	34
3.2.3.2	Lodging tolerance of banana plants	34
3.3	Data collection	35
3.3.1	Farmer's field survey	35
3.3.1.1	Study area	35
3.3.1.2	Sample selection for field survey	36
3.3.1.3	Conducting survey	36
3.3.2	Soil sample collection	36
3.3.2.1	Determination of soil sampling depth	37
3.3.2.2	Taking soil sample in individual field and preparing for soil salinity test	37
3.3.2.3	Measuring electrical conductivity	38
3.3.3	Conducting of AHP workshops	38
3.3.3.1	Determine the hieratical structure for the problem	39
3.3.3.2	Stakeholder priorities on sustainability criteria	39
3.3.3.3	Pairwise comparison and consistency checking on criteria	40
3.3.3.4	Stakeholder priorities on indicators	40
3.3.3.5	Pairwise comparison and consistency checking on indicators	41
3.4	Analysis of data	41

3.4.1	Independent two sample t-test	41
3.4.2	Calculation of overall sustainability index for the systems	41
3.4.2.1	Normalization of indicators	41
3.4.2.2	Calculate normalized average indicator values for the system	42
3.4.2.3	Combine the normalized average indicators at system level	43
Chapter IV Descriptions of the Study Site		44
4.1	Description of Sri Lankan socio-economic characteristics	44
4.1.1	Location and topography	44
4.1.2	Climate	48
4.1.2.1	Rain fall	48
4.1.2.2	Temperature	48
4.1.3	Population	49
4.1.4	Land Use Pattern	50
4.1.5	Agriculture	50
4.1.5.1	Contributions of agriculture for Sri Lankan economy	51
4.1.5.2	Major crops land extent	53
4.1.5.3	Major fruit cultivation land extent	54
4.2	Description of Anuradhapura district	55
4.2.1	Topography of the dry zone area	55
4.2.2	Soil and landform pattern	55
4.2.3	Rain fall of the district	56

4.2.4	Land use	57
4.2.5	Agriculture and cropping pattern	58
4.2.6	Fruit cultivation	59
4.2.7	Ground water utilization	60
4.2.8	Banana cultivation using ground water	61
4.2.8.1	Banana cultivation with surface irrigation	62
4.2.8.2	Banana cultivation with drip irrigation	65
4.2.8.3	Banana marketing	67
4.2.9	Socio-economic conditions	70
4.2.9.1	Population	70
4.2.9.2	Economic condition	71
4.2.9.3	Social organization and social activities	73
Chapter V	Results and Discussion	75
5.1	Banana cultivation	75
5.1.1	Banana cultivated area of sampled households	75
5.1.2	Annual water pumped for banana cultivation	77
5.1.3	Production cost of banana cultivation	78
5.1.4	Income of banana cultivation	83
5.2	Level of sustainability indicators in banana cultivation	85
5.2.1	Socioeconomic sustainability indicators	85
5.2.1.1	Annual net profit per unit banana land	85
5.2.1.2	Water productivity of banana cultivation	87
5.2.1.3	Income variation of banana cultivations	90

5.2.1.4	Farmer social participation	93
5.2.2	Ecological sustainability indicators	96
5.2.2.1	Annual chemical fertilizer usage	96
5.2.2.2	Annual agro chemical usage	104
5.2.2.3	Soil salinity level in the banana fields	109
5.2.3	Agronomical sustainability indicators	111
5.2.3.1	Weed infestation of the banana field	111
5.2.3.2	Lodging tolerance of banana plants	114
5.3	Changing trend of sustainability indicators	116
5.3.1	Changing trend of water divert	116
5.3.2	Changing trend of banana yield	117
5.3.3	Changing trend of social participation	119
5.3.4	Changing trend of chemical fertilizer usages	120
5.3.5	Changing trend of agro chemical usages	124
5.3.6	Changing trend of weed infestation	125
5.3.7	Changing trend of lodging rate and prop supply of banana plant	126
5.4	Calculated weights for sustainability criteria and indicators	126
5.5	Overall sustainability of drip and surface irrigated banana cultivation	127
5.5.1	Normalized average values for indicators	127
5.5.2	Overall sustainability index for the systems	130

Chapter VI	Summery of the finding and recommendations	132
6.1	Summery of the finding	132
6.1.1	Socio economic sustainability	134
6.1.2	Ecological sustainability	135
6.1.3	Agronomic sustainability	136
6.1.4	Overall sustainability	137
6.2	Recommendations	137
6.2.1	Subsidies and credits	138
6.2.2	Training on drip irrigation	139
6.2.3	Increasing sustainability of the systems	139
6.2.4	Future research	140
6.3	Limitation of the study	141
Bibliography		142
Appendices		150
Curriculum Vitae		182

List of Table

		Page
Table 1.1	Institutes involved in promotion on micro irrigation	3
Table 2.1	The nine point scale for pair wise comparison	11
Table 2.2	Average consistencies of random matrices	17
Table 2.3	Sustainability indicators of agriculture at household and village level	20
Table 3.1	Soil salinity distribution of deferent depth in two systems	37
Table 3.2	Multiplication factors to calculate soil EC	38
Table 3.3	Used indicators and their units	42
Table 4.1	Thirty years average temperature throughout year for different region in Sri Lanka	49
Table 4.2	Detail on population in Sri Lanka	49
Table 4.3	Land use pattern in Sri Lanka	50
Table 4.4	Land extend under different climatic zone	50
Table 4.5	Cultivation land extent of some major crops in Sri Lanka	54
Table 4.6	Major fruit crops cultivation land extent in Sri Lanka	54
Table 4.7	Agricultural lands in Anuradhapur district	57
Table 4.8	Paddy land extend under different irrigation methods in Anuradhapura district	58
Table 4.9	Other crops land extend in Anudhapura district	59
Table 4.10	Fruit cultivation extend in Anuradhapura district -2005	60

Table 4.11	Number of agro wells in agrarian divisions in Anuradhapura district	61
Table 4.12	Deferent irrigation interval at peak drought period in surface irrigated banana	64
Table 4.13	Deferent irrigation interval at peak drought period in drip irrigated banana	67
Table 4.14	Demography characters in Anuradhapura district	70
Table 4.15	Some economic indicators of household level in Anuradhapura district	72
Table 4.16	Prominent social organization in Anuradhapura district	74
Table 5.1	Banana cultivated land extend in the sample	76
Table 5.2	Comparison of cultivated land size (m ²) percentages in two systems	77
Table 5.3	Annual water pumped to unit banana land in two systems	78
Table 5.4	Production cost of banana under two irrigation methods	79
Table 5.5	Contribution of cost items for annual average cost in two systems	81
Table 5.6	Comparison of labor cost items in two systems	82
Table 5.7	Composition of Irrigation cost in two systems	83
Table 5.8	Annual income of unit banana land	84
Table 5.9	Results of the independent two sample t- test for annual net profit for banana cultivation	86
Table 5.10	Farmers frequency of normalized net profit and average normalized net profit in two systems	87
Table 5.11	Results of the independent two sample t test for water productivity of two Systems	88
Table 5.12	Farmers frequency of normalized water productivity and average normalized value for water productivity in two systems	90

Table 5.13	Results of the independent two sample t test for coefficient of variance of income	92
Table 5.14	Farmers frequency of normalized income variation and normalized average values of income variation in two systems	93
Table 5.15	Results of the independent two sample t test for social participation rate	94
Table 5.16	Farmers frequency of normalized farmer social participation and average normalized values in two systems	95
Table 5.17	Fertilizer recommendation for banana cultivation	96
Table 5.18	Amount of urea use in two systems	97
Table 5.19	Amount of MOP use in the two systems	98
Table 5.20	TSP utilization of the banana cultivation	99
Table 5.21	Farmers percentages of fertilizer application method in two systems	100
Table 5.22	The proportion of total fertilizer usage in two systems based on recommendation amount	102
Table 5.23	Farmers frequency of normalized of total chemical fertilizer utilization and normalized average values in two systems	103
Table 5.24	Carbofuran utilization in two systems	105
Table 5.25	Glyphosate utilization in two systems	106
Table 5.26	Farmers frequency of normalized of agrochemical utilization and normalized average values in two systems	108
Table 5.27	Results of the independent two sample t- test for electrical conductivity in banana fields	109
Table 5.28	Farmers frequency of normalized values of soil salinity and normalized average values for soil salinity in two systems	111
Table 5.29	Results of the independent two sample t- test for weeding frequency in banana cultivation	112
Table 5.30	Farmers frequency of normalized values of weed infestation and normalized average values for weed infestation in two systems	113

Table 5.31	Results of the independent two sample t- test for lodging tolerance of banana cultivation	114
Table 5.32	Farmers frequency of normalized values of lodging tolerance and normalized average values of lodging tolerance in two systems	115
Table 5.33	Farmer response of changing trend of amount of water pumped during last five years	117
Table 5.34	Farmer response of changing trend of banana yield during last five years	118
Table 5.35	Farmer response of effect of irrigation method for time allocation on social activity in last five years	119
Table 5.36	Farmer response of changing trend on chemical fertilizer usage during last five years	121
Table 5.37	Detail of chemical fertilizer utilization trend in two systems	123
Table 5.38	Farmer response of changing trend on agro chemical utilization in two systems	124
Table 5.39	Farmer response of changing trend on weed infestation in two systems	129
Table 5.40	Calculated final weights for sustainability criteria and indicators at workshops	127
Table 5.41	Normalized average values for each indicator in two systems	129
Table 5.42	Overall sustainability index for two systems	131

List of Figures

	Page
Figure 1.1 Diffusion of Shallow wells (agro wells) in dry zone, 1985-2000	2
Figure 2.1 Hierarchical model for a problem	11
Figure 3.1 Framework for research process	25
Figure 3.2 Hierarchical structure for weighting procedure	39
Figure 4.1 Three main climate zone in Sri Lanka	45
Figure 4.2 Agro ecological regions in the Sri Lanka	47
Figure 4.3 Mean monthly rainfall pattern of wet zone and dry zone (1961- 2002)	48
Figure 4.4 Composition of Sri Lankan GDP based on economic sectors	52
Figure 4.5 Composition of employment based on economic sectors in Sri Lanka, 2004	52
Figure 4.6 Value shares of major categories of Sri Lankan agriculture	53
Figure 4.7 Geographical position of Anuradhapura district	56
Figure 4.8 Monthly average rainfall 2002 to 2004 in Anuradhapura district	57
Figure 4.9 Banana marketing methods in Anuradhapura district	68
Figure 4.10 Types of own vehicles for banana transport in Anuradhapura district	68
Figure 4.11 Banana transport methods to wholesale markets in Anuradhapura district	70
Figure 4.12 Percentages of farm families according to nationality in Anuradhapura district	71

Figure 4.13	Contribution of agriculture for provincial gross national product in north central province	72
Figure 4.14	Contribution of fruit crops for provincial gross domestic product in north central province during 1998-2001	73
Figure 5.1	Average fertilizer used in the banana cultivation and recommended amount	101
Figure 5.2	Comparison of normalized average indicators in two irrigation methods under banana cultivation	130

List of Appendices

	Page
Appendix 1 Geographical situation of Sri Lanka	148
Appendix 2 Interview schedule for household survey	149
Appendix 3 Calculation of indicators' weights at AHP workshops	164
