ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to my supervisor, Assoc. Prof. Dr. Chaiwat To-anun for his excellent supervision, never ending encouragement, valuable suggestions, constructive criticisms throughout the study and most importantly, introducing me to this fascinating world of fungi.

My sincere thanks is also attributed to Assoc. Prof. Dr. Chiharu Nakashima, Faculty of Bioresources, Mie University, Japan, for his kindness, sharing his precious knowledge in taxonomy, invaluable help, advice and support on many aspects of the work, suggestions on this study, and also co-supervisor, Dr. Sarunya Valyasevi for encouragement, kindness and her valuable comments. I also thank Assoc. Prof Dr. Kasem Soyong, Assoc. Prof. Nuchnart Jonglaekha, Asst. Prof. Dr. Chuanpit Boonchitsirikul and Asst. Prof. Dr. Worawan Chaleeprom for advice and critical comments.

I would like to thank Pee Iman Hidayat for his stimulating discussion, excellent technical assistance, constant support, encouragement, positive advice. I have received tough training from him, especially in writing skills.

I also would like to thank Mr. J. F. Maxwell, the curator of CMU Herbarium, Faculty of Biology, Chiang Mai University for his help, and identification of the host plant.

My warm thanks go to my best friends, Harada Mamoru, Araki Ikumitsu, Shiroya Yoshiaki, Keiichi Motohashi and Akashi Tadashi, Graduate School of

Bioresources, Mie University, Japan, for encouragement and for all their help. Masuda Minoru is also thanked for his kindness mind and special friendship.

I am very grateful to my other colleagues for their kindness and friendship, and I will always remember the good times we had.

I would like to acknowledge Chiang Mai University for the award of a post-graduate studentship for my study.

Finally, much appreciation is specially expressed to my parents and my brother who provided their kindness, endless support, love, care and patience in various ways. This thesis, I am dedicating to my parents whom I love most.
