## ACKNOWLEDGEMENTS

I would thank the Thailand Research Fund (TRF) for awarding me with a Royal Golden Jubilee Ph. D. Scholarship. I also acknowledge the McKnight Foundation for partially financial support in some parts of my research.

I am deeply gratefully thank to my advisor, Associate Professor Dr. Sansanee Jamjod for her extended valuable guidance, constructive idea, valuable moral supports and the encouragement throughout the period of this study.

I am also deeply gratefully thank Professor Dr. Benjavan Rerkasem for her research guidance, valuable advice, moral supports during the long period of this study, especially her valuable suggestions on my manuscript, and my thesis.

My special grateful for Professor Dr. Barbara A. Schaal, Department of Biology, Washington University for priming my understanding of the fundamental of population genetics, plentifully valuable guidance and working really hard for giving suggestion and teaching me how to write the nice manuscript and help me revised it until the submission.

I am gratefully to Assoc. Prof. Dr. Dumnern Karladee, Associate Professor Dr. Somboon Anatalabhochai and Dr. Natchanapong Vongburi for kind suggestions and completed my thesis and Dr. Chanya Maneechote for valuable advice and provided some common wild rice and weedy rice samples in this study.

I also thank Assistant Professor Dr. Yu-Chung Chiang and Dr. Jason P. Londo for their helpful in molecular techniques and valuable computer programs for molecular analysis. I thank former and present member of the Schaal lab and Olsen lab, Department of Biology, Washington University in St. Louis, USA for molecular lab facility and their helping with microsatellite analysis during the work in the US.

I would also acknowledge the former and present member of CMUPN*lab*, Agronomy Division, Department of Plant Sciences and Natural Resource, Faculty of Agriculture, Chiang Mai University for sharing their knowledge, gave me the new vision about the agriculture, and especially their moral supports when I got pressure. I also thank Thai Rice Research Institute, Department of Agriculture for providing breeder seed of the cultivated rice varieties and farmers from the studied villages in Chiang Mai and Mae Hong Son province for providing their information, experience and rice seeds in this study.

Finally, I am special gratefully to me family, my father who always encouraged and challenged me during the study, my beloved mother and my lovely sister who always behind me giving their love, support, understanding, patience and kindness which enable me to complete this study successfully.
