ACKNOWLEDGEMENTS

I would like to express my sincere thank to my thesis advisor, Assoc. Prof. Dr. Nuttha Potapohn, for her kind encouragement and valuable advice during this study which make this dissertation possible. I also appreciate the assistance of my co-advisor and examining committee members, Lect. Dr. Weenun Bundithya and Assoc. Prof. Dr. Soraya Ruamrungsri. My hearty gratitude also goes to Assoc. Prof. Dr. Pimchai Apavatjirut, the external examiner, and Assoc. Prof. Dr. Sansanee Jamjod, the graduate school examiner, for their valuable suggestions that make this thesis more informative.

I greatly appreciate Lect. Dr. Chita Inpar for his helpful guidance and valuable suggestions.

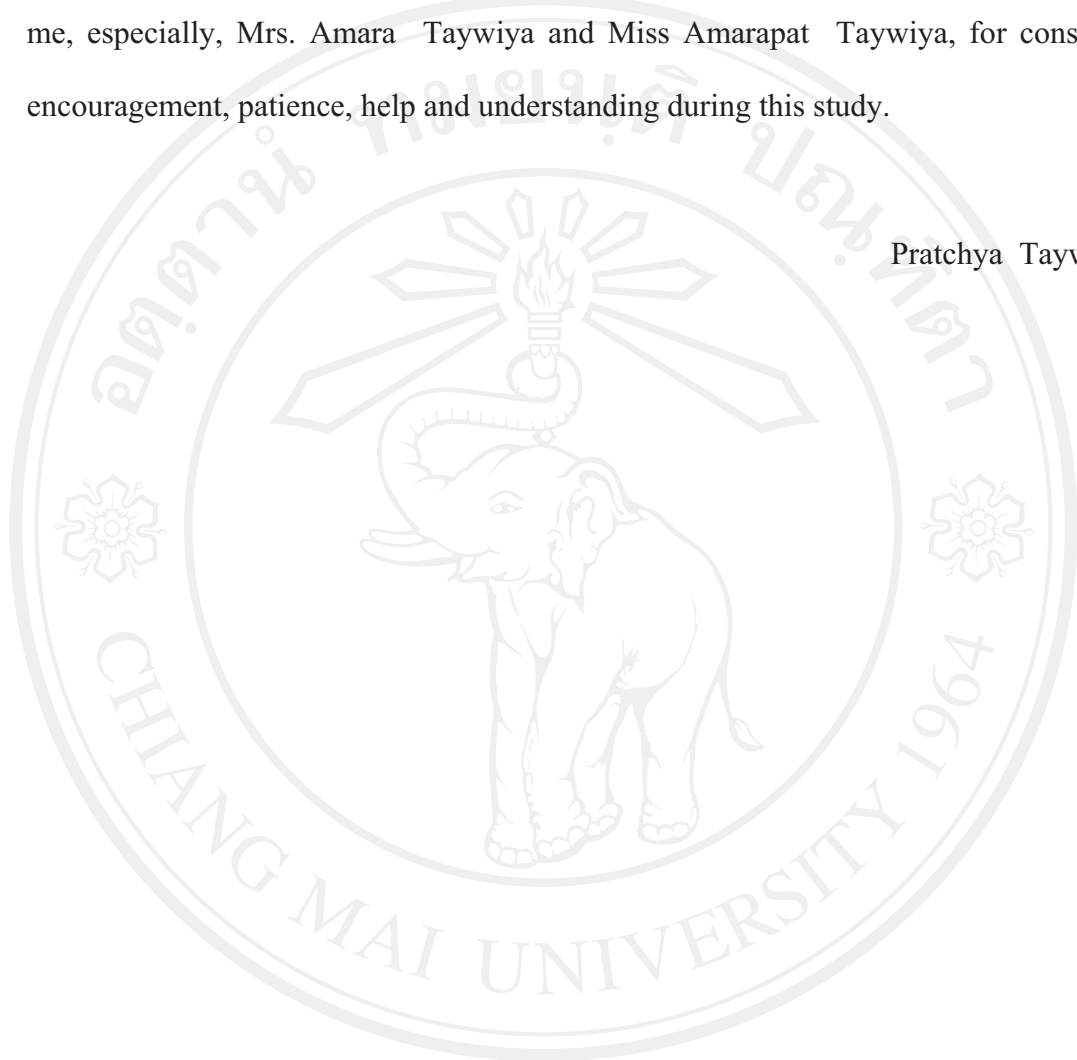

I am thankful to Dr. Tonapha Pusadee for suggestion about molecular data analysis and Miss Aroonothai Sawwa for her helpful in molecular techniques.

I am also thankful to the officers of Horticulture Division, Department of Plant Science and Natural Resources, Faculty of Agriculture, Chiang Mai University for their help.

This thesis is partially supported by the Center for Agricultural Biotechnology, Postgraduate Education and Research Development Office, Commission on Higher Education, Ministry of Education, the Development of Economic Flower Crop: Orchid (DEFECO) Project, Faculty of Agriculture, Chiang Mai University, Chiang Mai, Thailand and the Staff Development Project, Commission on Higher Education, Ministry of Education, Faculty of Science, Mahidol University, Bangkok, Thailand.

Finally, I am deeply grateful and very appreciative to my parents, my brother, all members of my family and my friends for the love, care and opportunities given to me, especially, Mrs. Amara Taywiya and Miss Amarapat Taywiya, for constant, encouragement, patience, help and understanding during this study.

Pratchya Taywiya
