ACKNOWLEDGEMENTS

My first sincere gratitude, I would like to express to my supervisor, Assoc. Prof. Dr. Chaiwat To-anun for his supervision, never ending encouragement, valuable suggestions, constructive criticisms throughout the study and invaluable help. He is more than a teacher to me.

Many of the ideas in this thesis are borrowed from person whose style was always very different from mine. Dr. Kevin Hyde, a man who introduced me to one of the exciting and wonderful world of science, 'Mycology'. My appreciation of Kevin is great. He taught me, indirectly, the benefits of writing, brain storming, and not to be afraid in expressing ideas from which gradually guiding me to gain self confidence. I'm still practicing.

Appreciation goes also to Dr. Typuk Artiningsih, who taught me to always be positive in any environment and condition. Her attitudes always inspire me to be who I am now.

My sincere thanks go to Dr. Sarunya Valyasevi for her kindness, invaluable help, advice and support on many aspects of the study.

I also thank Assoc. Prof. Nuchnart Jonglaekha, Assoc. Prof Dr. Kasem Soyong, Asst. Prof. Dr. Angsana Akarapisan and Asst. Prof. Dr. Chuanpit Boonchitsirikul, for the invaluable advice and critical comments on this thesis.

My warm thanks go to my friends, Lam, Ohnmar, Thida, Damodar, Cai and Aung Swe, for their kindness and special friendship. My best wishes for you all, guys.

I am very grateful to all other colleagues for their kindness and friendship, and I will always remember the good times we had. I would also like to acknowledge Chiang Mai University.

My special thank is always attributed to nong talek, a person whom I love most. Without her support, care and love, I would not be able to accomplish my study.

Finally, much appreciation is specially expressed to my parents, my sister and brother who always provided their endless support, love, care and patience. This thesis, I am dedicating to my parents whom I love most.

Iman Hidayat
