ACKNOWLEDGEMENT

Gratefully thanks were given to Dr. Tri Indrarini Wirjantoro, my thesis advisor, who always gave the great support and sharing experimental techniques in my whole work and took care of me through suggestion and discussion.

I thanked Assist. Prof. Dr. Sittisin Bovonsombut and Dr. Panida Rattanapitikorn for being my examiners and gave some comments for this thesis.

Sincerely thanked to Lanna Agro Industry Co. Ltd., Chiang Mai, Thailand for providing me frozen green soya bean during my experimental work and gratefully thanks to National Research Council of Thailand (NRCT) that financially supported this thesis.

Special thanked to all the staff of the Department of Food Science and Technology, Faculty of Agro-Industry, Chiang Mai University, in providing me the opportunity to use equipments and laboratory areas to do and complete my works.

I wished to thank all of Ph.D. and Master students from the Department of Food Science and Technology, Faculty of Agro-Industry, Chiang Mai University, for helping me to do sensory tests, suggesting, supporting and cheering me up during my study.

Finally, thank you very much for my wonderful family, especially my father, mother and sister, for their great encouragement, financial support and cheering me up throughout my study.

Paveena Kaewyongpang
