ACKNOWLEDGEMENT

I wish to express my sincere gratitude and respect to Assoc. Prof. Mitra Casley, M.D. for her ideas, and advice throughout my Ph.D.'s program. I am thankful for her willingness to take the time to make suggestions and help me achieve my goals. Her support, guidance, and encouragement were most appreciated.

Sincerely thanks to my supervisor, Asst. Prof. Dr. Aphirak Pianmongkhol for his enthusiastic guidance, help and support during this thesis. I am also very grateful to Dr. Tri Indrarini Wirjantoro for her incessant supervision and for her enormous help contributed to this thesis. I wish to thank all of Master and Bachelor students and technicians of the Department of Food Science and Technology, School of Agro-Industry, School of Health Science and Science and Technology Instruments Center, Mae Fah Luang University for their support and kind assistance. In particular, I am grateful to the Department of Food Science and Technology, Faculty of Agro-Industry, Chiang Mai University for providing me chemicals and equipments.

Finally, I would especially like to thank my parents for support, and encouragement that they have given me throughout my academic career.
