ACKNOWLEDGMENT

I would like to express my gratitude and appreciation to my advisor, Dr. Pranee Leechanachai, for her excellent guidance and suggestions throughout this study. Without her support and encouragement, this thesis would not have been completed successfully.

My gratitude is extended to Khun Sutheewan Sriuprayo, the Director of the Regional Medical Sciences Center, Chiang Mai, and my supervisor, Khun Salukchit Chutipongvivate, who guided me throughout this study.

I wish to thank all examining committee members for their valuable suggestions and corrections of this thesis.

I would also like to thank Dr. Kriengsak Jitvacharanun, the Former Director of the Venereal Disease and AIDS Control Center, Region 10, Chiang Mai, the Director of the Research Institute for Health Sciences, Chiang Mai University and Khun Kanlaya Wongworapat for providing specimens.

I am grateful to Dr. Wasan Chantratita for his advice and guidance in computer software and my sincere thanks go to Khun Khumpian Khumnil for her advice, friendship, co-operation and excellent assistance.

I also wish to show appreciation to my parents and sisters for their love, understanding and encouragement throughout this study.

Finally, I thank the Department of Clinical Microbiology, Faculty of Associated Medical Sciences for their support in providing instruments and a place to study, and the Faculty of Graduate Studies for allowing me to have this project investigated.

Punnarai Veeraseatakul
