ACKNOWLEDGEMENT

I would like to express my gratitude and appreciation to my advisor, Dr. Pranee Leechanachai, for her excellent guidance and suggestions throughout this study. Without her support and encouragement, this thesis would not have been a complete success.

I wish to thank all the examining committee members for their valuable suggestions and corrections of this thesis.

I would also like to thank the personnel of the gynecological clinic of Maharaj Nakorn Chiang Mai Hospital for providing specimens, and my sincere thanks go to Khun Khumpian Khumnil and Khun Boonsong Tunchai for their advice, friendship, co-operation and excellent assistance.

I also wish to show appreciation to my grandparents, parents and wife for their love, understanding and encouragement throughout this study.

I wish to thank the Department of Clinical Microbiology, Faculty of Associated Medical Sciences for their support in providing instruments and a place to study and the Faculty of Graduate School for allowing me to have this project investigated.

Finally, I wish to thank the National Science and Technology Development Agency in providing the local scholarship for my graduate study.

Chatsri Kuansuwan
