## ACKNOWLEDGEMENT

I would like to express me sincere gratitude and appreciation to my advisor, Dr. Ratchada Cressey, for her excellent guidance and suggestions throughout this study. Without her support and encouragement, this thesis would not have been completed successfully.

I give my gratitude to Associate Professor Dr. Nirush Lertprasertsuk, my co-advisor, for her valuable suggestions and corrections of this thesis. I would like to offer my special thanks for her kindness.

Many thanks are also given to my dear friends at the Faculty of Associated Medical Sciences, Chiang Mai University, for their help and warm friendship.

My heart felts thanks go to my grandparents and parents for their love, patience, understanding and encouragement throughout my study.

I also wish to thank the Department of Clinical Chemistry, Faculty of Associated Medical Sciences for their support in providing instruments and a place to study and the faculty of Graduate School for allowing conduct this project.

Finally, I wish to thank the Nation Center for Genetic Engineering and Biotechnology (BIOTECH) for their financial support.
