ACKNOWLEDGEMENTS

The author wishes to express sincerely thankfulness to Dr. Sawitree Chiampanichayakul, thesis advisor, for her valuable guidance and comments, and her worthiness suggestions on the manuscript.

My grateful thank to my co-advisor, Assoc. Prof. Dr. Watchara Kasinrerak, for his effort proving the every significant experiment, generating important ideas and thankful for the generosity providing all laboratory facility.

Extending my appreciation to Asst. Prof. Dr. Thanusak Tatu, co-advisor, for his encourager and giving excellent technical assistances. I would like to thank Assoc. Prof. Dr. Supan Fucharoen for his generous providing sample of the alpha-thalassemia 2 with 4.2 kb deletion DNA. I would like to thanks all examining committee for their valuable comment and approving this accomplishment.

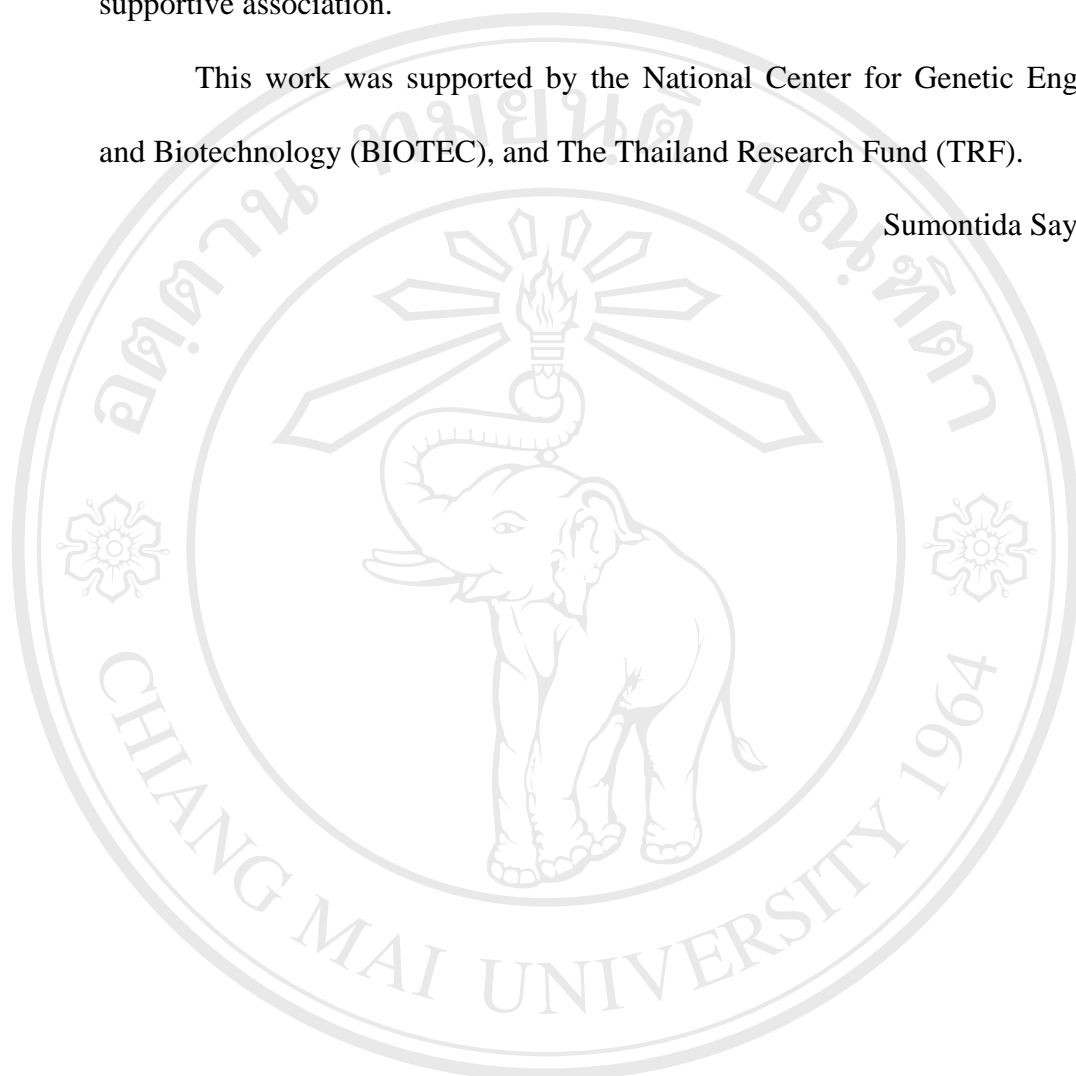

I would like to express my sincere thanks to Asst. Prof. Dr. Wirawit Piyamongkol, of the Department of Obstetrics and Gynecology and Ms. Tasaneeya Chamrasratanakorn, of the Department of Pediatrics (Hematology), Faculty of Medicine, Chiang Mai University, for providing blood samples of Hb Bart's hydrops fetalis.

I thanks all staffs member at Assoc. Prof. Dr. Watchara Kasinrerak's laboratory for attentive assistant. I am also indebted to the Department of Medical Technology, Faculty of Associated Medical Sciences, Chiang Mai University, for all supports and laboratory facilitation.

Thank you to my family and friends for there always giving love and supportive association.

This work was supported by the National Center for Genetic Engineering and Biotechnology (BIOTEC), and The Thailand Research Fund (TRF).
