## ACKNOWLEDGEMENTS

The author wishes to express sincere gratitude and appreciation to Assoc. Prof. Dr. Watchara Kasinrerak, thesis advisor, for his excellent guidance, continuous discussion and vast knowledge. Without his support and encouragement, this thesis could not be accomplished.

I would like to express my great appreciation to Dr. Sawitree Chiampanichayakul and Dr. Panida Khunkaewla for guidance and interest in solving many problems throughout my works.

I would like to offer my special thanks to Assoc. Prof. Dr. Chatchai Tayapiwatana and Dr. Chunya Puttikhunt and all examining committee for their kindness suggestions and valuable advice.

I also wish to express my great appreciation to all staff members of Assoc. Prof. Dr. Watchara Kasinrerak's, Assoc. Prof. Dr. Chatchai Tayapiwatana's and Asst. Prof. Dr. Tanusak Tatu's laboratory for their kind help, friendship and co-operation. Many thanks are also extended to all of my friends for their help and warm friendship.

I would like to thank the Department of Medical Technology, Faculty of Associated Medical Sciences, Chiang Mai University for providing instruments and a place for the study.

Finally, I would like to express my great gratitude to my parents and my relative for their love and encouragement throughout this study.

This work was supported by The National Center for Genetic Engineering and Biotechnology (BIOTEC) and The Thailand Research Fund (TRF).
