ACKNOWLEDGEMENTS	iii
ENGLISH ABSTRACT	iv
THAI ABSTRACT	vii
LIST OF TABLES	xv
LIST OF FIGURES	xvi
ABBREVIATIONS	xviii
CHAPTER I: INTRODUCTION	1
1.1 Statement and significance of the problem	1
1.2 Literature reviews	3
1.2.1 Immune system	3
1.2.1.1 Innate immunity	6
1.2.1.2 Adaptive immunity	7
1.2.1.2.1 Humoral mediated immunity	10
1.2.1.2.2 Cell-mediated immunity	10
1.2.2 Leukocyte surface molecules	11
1.2.2.1 Nomenclature of leukocyte surface molecules:	11
Cluster of Differentiation (CD) system	
1.2.2.2 General structure of cell surface proteins	12
1.2.2.3 Biological functions of leukocyte surface molecules	14
1.2.3 Lymphocytes	25
1.2.3.1 T lymphocytes	26

1.2.3.2	B lymphocytes	30
1.2.3.3	Natural Killer cells	31
1.2.4	Monoclonal antibody	33
1.2.4.1	Production of monoclonal antibody	34
1.2.5	Leukocyte surface molecules in medical applications	40
1.3	Objective	47

CHAPTER II: MATERIALS AND METHODS

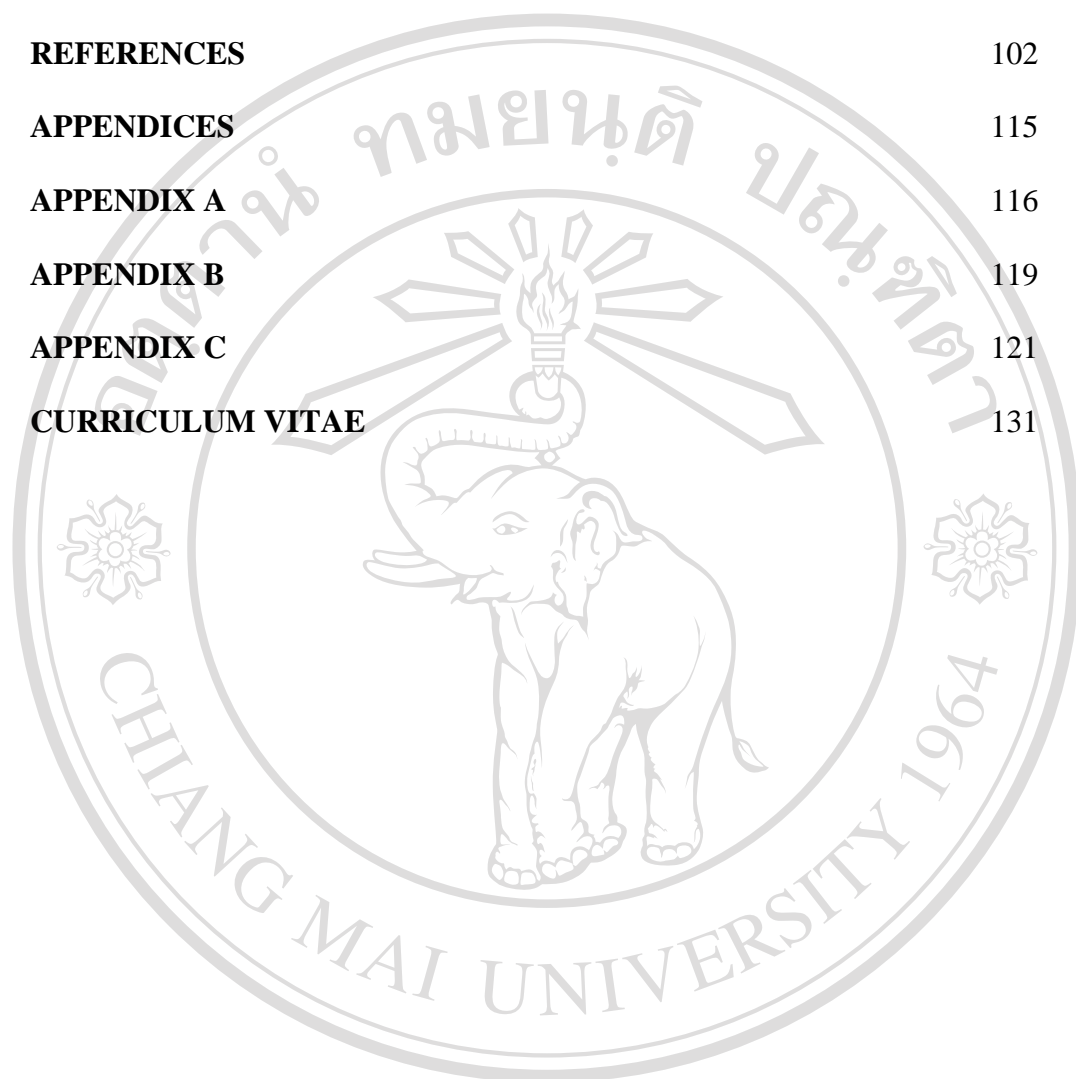

2.1	Chemicals, antibodies, cell lines and instruments used in this study	48
2.2	Large scale production and purification of monoclonal antibody (mAbs) MT3 and COSA2A	48
2.2.1	Production of ascitic fluid	49
2.2.2	Purification of monoclonal antibodies by affinity chromatography	49
2.3	SDS-PAGE for determination of the purity of monoclonal antibodies	50
2.4	Cellular distribution of the molecules recognized by monoclonal antibodies MT3 and COSA2A	50
2.4.1	Sample preparation	50
2.4.2	Indirect immunofluorescent staining	54
2.5	Analysis of molecules recognized by mAbs MT3 and COSA2A on lymphocyte sub-populations.	54
2.5.1	Analysis of molecules recognized by mAbs MT3 and COSA2A on B lymphocytes and NK cells	55

2.5.2	Analysis of molecules recognized by mAbs MT3 and COSA2A on T lymphocytes and T lymphocyte subsets	55
2.6	The molecules recognized by mAbs MT3 and COSA2A on CD45RO ⁺ , CD45RA ⁺ and CD45RB ⁺ cells	57
2.7	SDS-PAGE and Western immunoblotting	57
2.7.1	Cell lysate preparation	57
2.7.2	SDS-PAGE and Western immunoblotting	58
2.7.3	The chemiluminescence detection system	58
2.8	Immunoprecipitation	59
2.8.1	Biotinylation and preparation of cell lysates	59
2.8.2	Preclearing of biotinylated cell lysates	59
2.8.3	Coupling of monoclonal antibodies on protein G Sepharose beads	59
2.8.4	Immunoprecipitation	60
2.9	Surface expression of MT3 molecules and COSA2A molecules on mitogen-activated PBMCs	60
2.10	Proliferation assay	61
2.10.1	Immobilization of anti-CD3 mAb	61
2.10.2	Carboxyfluorescein diacetate succinimidyl ester (CFSE) labeling of PBMCs	61
2.10.3	Proliferation assay	62

CHAPTER III: RESULTS

3.1	Large scale production and purification of mAbs MT3 and COSA2A	63
3.2	Cellular distribution of the molecule recognized by mAbs MT3 and COSA2A	67
3.2.1	The expression of MT3 molecules and COSA2A molecules on peripheral blood cells.	67
3.2.2	The expression of MT3 and COSA2A molecules on hematopoietic cell lines.	70
3.3	The expression of MT3 and COSA2A molecules on lymphocyte sub-populations.	70
3.3.1	Study on B lymphocytes and NK cells	73
3.3.2	Study on T lymphocytes and T lymphocyte subsets	73
3.4	The expression of MT3 and COSA2A molecules on CD45RO ⁺ , RA ⁺ and RB ⁺ cells.	80
3.5	Biochemical study	82
3.5.1	Western immunoblotting	82
3.5.2	Immunoprecipitation	82
3.6	Surface expression of MT3 and COSA2A molecules on PHA-activated PBMCs	86
3.7	Regulation of anti-CD3 induced lymphocyte proliferation by mAbs MT3 and COSA2A	89

CHAPTER IV: DISCUSSION AND CONCLUSION	94
REFERENCES	102
APPENDICES	115
APPENDIX A	116
APPENDIX B	119
APPENDIX C	121
CURRICULUM VITAE	131

LIST OF TABLES

Table	Page
1.1 Ectoenzymes: nomenclature and catalytic reactions	18
1.2 Clinical applications of monoclonal antibodies	43
1.3 Monoclonal antibodies against CD molecules in clinical use for therapy of cancer	44
1.4 Monoclonal antibodies against CD molecules in clinical use or undergoing trial for therapy of immune system disorders	45
2.1 Hematopoietic cell lines used in this study	53
3.1 Percentage of MT3 ⁺ cells in lymphocytes and sub-population of lymphocytes	77
3.2 Percentage of COSA2A molecules on lymphocytes and sub-population of lymphocytes	79

LIST OF FIGURES

Figure	Page
1.1 Innate and adaptive immunity	5
1.2 Types of adaptive immunity	9
1.3 An early events in T lymphocyte activation	15
1.4 Ectoenzymes and the leukocyte-extravasation cascade	19
1.5 The updated leukocyte adhesion cascade	24
1.6 Regulation of T helper lymphocyte responses	29
1.7 Metabolic pathways of DNA synthesis	35
1.8 Pathway of nucleotide synthesis in the present of antifolate drug	37
1.9 Monoclonal antibody production	39
3.1 The reactivity of purified monoclonal antibodies, MT3 and COSA2A	65
3.2 SDS-PAGE analysis of the purified mAbs MT3 and COSA2A	66
3.3 Expression of MT3 molecules on peripheral blood cells	68
3.4 Expression of COSA2A molecules on peripheral blood cells	69
3.5 Expression of MT3 molecules on various hematopoietic cell lines	71
3.6 Expression of COSA2A molecules on various hematopoietic cell lines	72
3.7 Expression of MT3 and COSA2A molecules on B lymphocytes and NK cells	75
3.8 Expression of MT3 molecules on T lymphocytes and sub-population of T lymphocytes by two-color immunofluorescence analysis	76

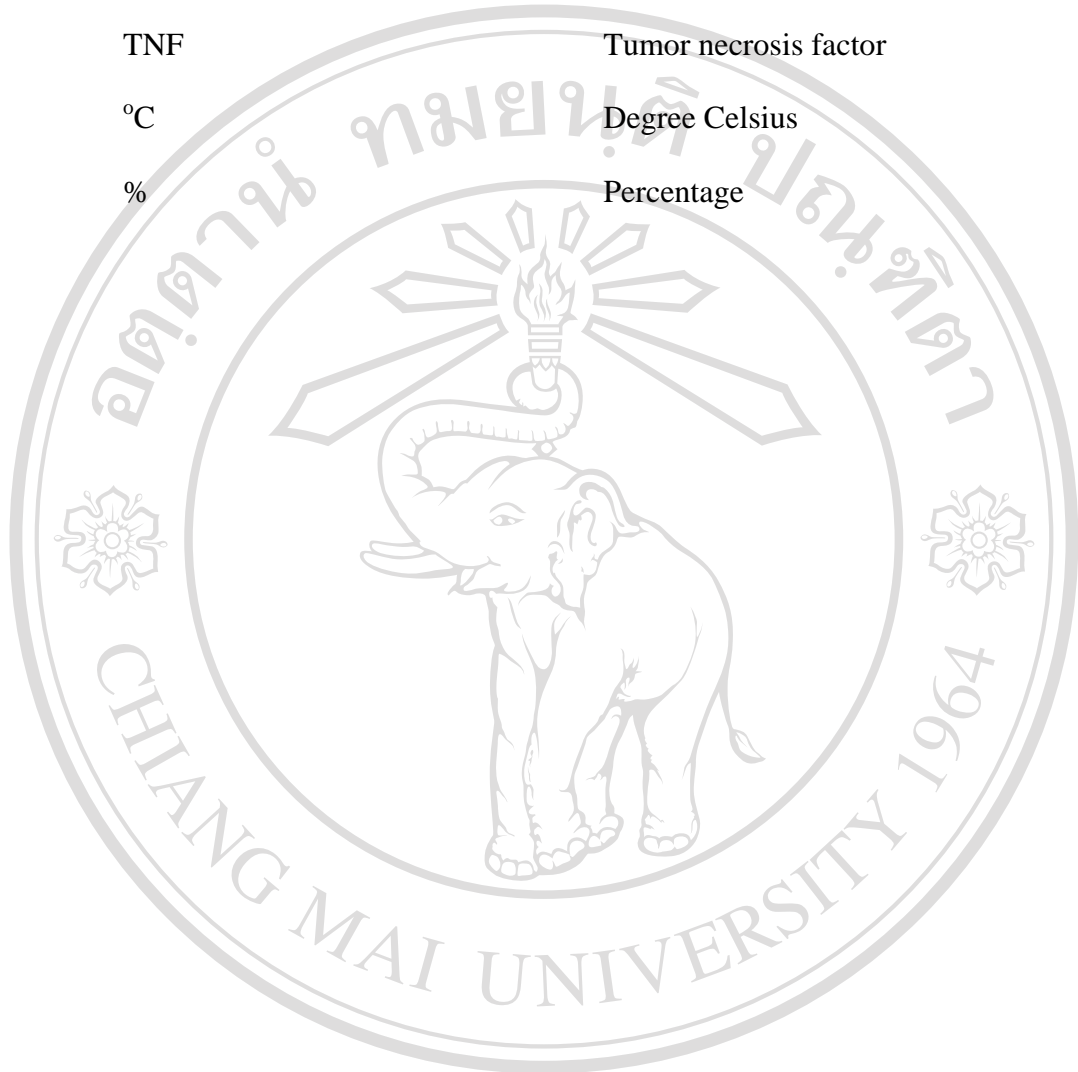

3.9 Expression of COSA2A molecules on T lymphocytes and sub-population of T lymphocytes by two-color immunofluorescence analysis	78
3.10 Expression of MT3 and COSA2A molecules on CD45RA ⁺ , CD45RB ⁺ and CD45RO ⁺ cells	81
3.11 Western immunoblotting analysis of cell surface molecules recognized by mAbs MT3 and COSA2A	84
3.12 Immunoprecipitation for characterization of cell surface molecules recognized by mAb MT3	85
3.13 Expression of MT3 molecules on PHA-activated PBMCs	87
3.14 Expression of COSA2A molecules on PHA-activated PBMCs	88
3.15 Effect of mAb MT3 on OKT3-induced T lymphocyte proliferation	90
3.16 MT3 has no effect in T lymphocyte proliferation	91
3.17 Effect of mAb COSA2A on OKT3-induced T lymphocyte proliferation	92
3.18 COSA2A has no effect in T lymphocyte proliferation	93

LIST OF ABBREVIATIONS

ADCC	Antibody-dependent cell-mediated cytotoxicity
AIDS	Acquired immunodeficiency syndrome
APC	Antigen presenting cell
APS	Ammonium persulfate
BSA	Bovine serum albumin
CD	Cluster of differentiation
CFSE	Carboxyfluorescein diacetate, succinimidyl ester
CMI	Cell-mediated immunity
CTL	Cytotoxic T lymphocyte
EDTA	Ethylenediamine tetraacetic acid
FCS	Fetal calf serum
FITC	Fluorescein isothiocyanate
g	Gram
HGPRT	Hypoxanthine Guanine Phosphoribosyl Transferase
HIV	Human immunodeficiency virus
HLDA	Human leukocyte differentiation antigens workshops
HMI	Humoral mediated immunity
IFN	Interferon

Ig	Immunoglobulin
IgE	Immunoglobulin E
IgG	Immunoglobulin G
IgM	Immunoglobulin M
Igs	Immunoglobulins
IL	Interleukin
kDa	Kilodalton
L	Liter
LPS	Lipopolysaccharide
M	Molarity
MHC	Major histocompatibility complex
mAb	Monoclonal antibody
ml	Milliliter
mg	Milligram
NaCl	sodium chloride
NaHCO ₃	sodium bicarbonate
PBMC	Peripheral blood mononuclear cell
PBS	Phosphate buffered saline
PE	Phycoerythrin
pH	Power of hydrogen
PHA	Phytohaemagglutinin
µg	Microgram
µl	Microliter
ng	Nanogram

SD	Standard deviation
TLR	Toll-like receptor
TNF	Tumor necrosis factor
°C	Degree Celsius
%	Percentage
