ACKNOWLEDGEMENT

I gratefully express my sincere gratitude and appreciation to my thesis advisor, Assistant Professor Dr. Ratchada Cressey, for her excellent guidance, continuous discussion and kindness. Without her support and sincerity this thesis would not come to light.

I also thank Assistant Professor Dr. Busayamas Chewasakulyong, Department of Internal Medicine, Faculty of Medicine, Chiang Mai University, for her help in recruiting lung cancer patients for this study.

This work was financially sponsored by the National Research Council of Thailand (NRCT). I gratefully acknowledge the financial support from the National Center for Genetic Engineering and Biotechnology (BIOTEC) and Professor Dr. Watchara Kasinrerk for his leadership which enables us to get this support.

I thank Jaehom hospital and the Lampang Provincial Health Office for giving me the opportunity to complete this post-graduation study.

Many special thanks are also extended to all the case and control subjects, and all the research staffs in Assistant Professor Dr. Ratchada Cressey's laboratory for their help and warm friendship, Jaehom medical laboratory staff for their courage, the staff of Clinical Chemistry, Faculty of Associated Medical Sciences for their support in providing and helping with the instruments.

Finally, my heart filled with thanks to my parents for their love, understanding and encouragement throughout my life.

Jaewwaew Klinchid
