ACKNOWLEDGEMENT

This thesis could not have been completed without my advisor Asst. Prof. Dr. Ubon Pirunsan who helped, stimulated, suggested, encouraged and challenged me, throughout my academic program.

I would like to express my sincere gratitude and appreciation to Asst. Prof. Dr. Aatit Paungmali , Asst. Prof. Dr. Rotsalai Kanlayanaphotporn and Asst. Prof. Patraporn Sitalertpisan for their valuable suggestions and helpful advices.

I would like to acknowledge and extend my heartfelt gratitude to the following my colleagues and friends from the Department of Physical therapy, Chiang Mai University who shared their personal experience and valuable hints with me, supported me in my research work. Especially, I would like to thank Natharika Srithum for all her assistance on the setting of ultrasound equipment and all volunteers who participated in my research.

Finally, I would like to give my special appreciation to my family which words alone cannot express what I owe them for there encouragement and patient love in all the time, which enabled me to complete this thesis.
