ACKNOWLEDGEMENTS

First of all, I would like to express my sincere gratitude and deep appreciation to Dr. Piranit Kantaputra for giving me the opportunity to work on this project. His guidance, valuable advice, patience, kindness and valuable encouragement are greatly appreciated. Without his support and kindness, this thesis would not have been finished. I also wish to express my special thank to Dr. Pranoot Tanpaiboon for allowing me to study her Thai EEC Family.

Sincere and grateful appreciation is also expressed to Professor Dr. Raoul CM Hennekam for his assistance, helpful advices. Also I would like to thank Professor Volker Dötsch and Mr. Jan Heering for their assistance on making protein models of the TP63 mutations.

This thesis would not have been completed without the assistance from my examining committees, including Dr. Vesarat Wessagowit, Professor Dr. Chulabhorn Pruksachatkunakorn and Associate Professor Dr. Dhirawat Jotikasthira.

Importantly, I am very grateful to the all patients and their families in this study for their kind participation. I am thankful to Dr. Arunee Keawkumpa, Dr. Montrikarn Paramee, Dr. Onnida Wattanarat, Miss Sarunya Tawanapong, Dr. Theerapong Khankasikum, Dr. Sutti Malaiwijitnond for patient recruitment, technical support, and friendship. I would like to thank Dr. Methawee Srikummul for training me the genetic laboratory techniques.

This thesis would not have been completed without the assistance from Professor Dr. M. Kevin O Carroll. I am thankful to him for the friendship, generous help, guidance, teaching, and suggestion for the English language. This work was supported by the European Community's Sixth Framework programme, the Thailand Research Fund, and the Graduate School Chiang Mai University.

I am grateful and wish to express my deepest appreciation to all the faculty and staff at the Division of Pediatric Dentistry, Department of Orthodontics and Pediatric

Dentistry, Faculty of Dentistry, Chiang Mai University for their valuable advices and providing suggestions and also thanks to all my friends in Pediatric Dentistry class for their friendship.

Finally, my special thanks go to my beloved parents especially Mrs. Sunee Ngarmvilirattana, my mother, for her unconditional love and care. I would like to thank Miss Orapun Sripathomsawat, my sister, and Surasart Sripathomsawat, my brother, for their love, encouragement and continuous support throughout my life. Without their kind support, this study would not have been possible.

Warissara Sripathomsawat
