ACKNOWLEDGEMENTS

I would like to express my grateful thanks to all those who gave me the possibility to complete this thesis. First of all, I want to thank my thesis advisor, Associated Professor Dr. Siriporn Chattipakorn, Department of Oral Biology and Diagnostic Science, Faculty of Dentistry, Chiang Mai University, for her useful advices and the permission to do this thesis in the first place. I would like to also thank to my master degree advisor, Dr. Ubonwan Theerapiboon, Division of Pediatric Dentistry, Department of Orthodontics and Pediatric Dentistry, Faculty of Dentistry, Chiang Mai University, for her helpful suggestion and support. I am also extremely indebted to Professor Dr. Nipon Chattipakorn, Director of Cardiac Electrophysiology Research and Training Center (CERT), Department of Physiology, Faculty of Medicine, Chiang Mai University, who kindly provided me with his knowledgeable suggestion and access to materials, equipments, and work places. Dr. Sarawut Kumphune, Department of Medical Technology, Faculty of Allied Health Sciences, Naresuan University, is another person that I really appreciate his excellent advices in carrying out the western blot procedures.

I wish to thank Dr. M. Kevin O Carroll, Professor Emeritus of the University of Mississippi School of Dentistry, USA and Faculty Consultant at Faculty of Dentistry, Chiang Mai University, and Dr. Naraphorn Paoprasert, a researcher at the National Metal and Materials Technology Center, for their assistance in preparing and editing this thesis. My sincere application is extended to Assistant Professor Dr. Piyanart

Chatiket, Department of Family and Community Dentistry, Faculty of Dentistry, Chiangmai University, for her help on statistical analysis.

I would like to thank all instructors both in the Division of Pediatric Dentistry, Department of Orthodontics and Pediatric Dentistry, and in the Faculty of Dentistry, Chiang Mai University, for their teaching and suggestions that were greatly helpful in completing my graduate study. Many thanks are also passed to all master students and staffs in the Division of Pediatric Dentistry, Department of Orthodontics and Pediatric Dentistry, and all CERT staffs, for their great help, support, and encouragement.

Especially, I wish to acknowledge all patients and their guardians for their willingness to be parts of this study. Furthermore, this study was funded through the Thailand Research Fund, the Faculty of Dentistry Fund, and the Chiang Mai University Fund.

I would like to also give my special thanks to Mr. Theerawut Wuthichat for his compassion, encouragement and generous understanding. Finally, I would like to express my profound gratitude and indebtedness to my beloved parents for their unconditioned love, encouragement, and support throughout my entire life. This thesis is especially dedicated to them.
