ACKNOWLEDGEMENTS

The writing of this thesis, I have received the help and encouragement from many people.

I wish to express my sincere appreciation to my advisor, Professor Dhirawat Jotikasthira, for his excellent advice, valuable help, careful editing my thesis and encouragement throughout the study. I also would like to express my grateful thanks to my co-advisors, Associate Professor Dr. Suttichai Krisanaprakornkit for his suggestions and helpful guidance; Associate Professor Dr. Prachya Kongtawelert and Associate Professor Dr. Siriwan Ongchai for their suggestions and guidance concerning biochemical analysis.

I am grateful to Dr. Peerapan Pothacharoen and all the scientists and technicians at the Thailand Excellence Center for Tissue Engineering, Department of Biochemistry, Faculty of Medicine, Chiang Mai University for their assistance in WF6 monoclonal antibody preparation and facilitating my laboratory procedure.

I wish to thank Professor M. Kevin O Carroll, Professor Emeritus of the University of Mississippi School of Dentistry, USA and Faculty Consultant at Faculty of Dentistry, Chiang Mai University, for his assistance in this thesis preparation and Dr. Piyanart Chatiket, Department of Community Dentistry, Faculty of Dentistry, Chiang Mai University, for her advice in the statistical analysis.

In addition, I wish to thank my friends and staff of the Department of Orthodontics and Pediatric dentistry, Faculty of Dentistry, Chiang Mai University for their encouragement; also of the Faculty of Dentistry, Chiang Mai University for the financial support. In addition, I gratefully acknowledge the essential role of my patients for their forbearance, cooperation and voluntariness to take part in this study.

Finally, I am deeply indebted to my family for their love, encouragement and support throughout this study. Without their support, I am not able to accomplish this thesis. Therefore, I would like to dedicate this thesis to my dear family.
