## Acknowledgements

This work would not be possible without the supports and encouragement from Dr. Komsan Suriya. He has trusted on my ability and encouraged me during the whole stage of the work. He has been abundantly helpful by instructing me the right track how to proceed my study in order to develop my own contributions to the academic world.

Moreover, I would also like to thank the examining committee, Professor Dr. Hung T. Nguyen and Associate Professor Dr. Songsak Sriboonchitta for giving me the most precious advice, comments and suggestions on my work.

The author would like to thank Professor Berlin Wu for his inspiration and stimulation of this study. His instructions and comments are so crucial to the study and make me confident to go on my work.

I would also like to thank the officer at the Financial and Investment Center (FIC), Chiang Mai University for his kind assistance in retrieving the data.

I cannot end without thanks to my father and mother for their constant encouragement and enormous love on which I have relied throughout my time at the academy.

Tatcha Sudtasan
