Acknowledgements	iii
Abstract in Thai	iv
Abstract in English	v
Table of Content	vi
List of Tables	viii
List of Figures	xi
Chapter 1 Introduction	
1.1 Rationale	1
1.2 Objectives	3
1.3 Scope of the study	4
1.4 Definitions	4
1.5 Benefits of the study	6
Chapter 2 Theory and Literature Review	
2.1 Theory	7
2.1.1 Regime switching	7
2.1.2 Dividend and factors that drive the dividend	9
2.2 Literature review	9
Chapter 3 Methodology	
3.1 Genetic algorithm	12
3.2 Criteria for the detection of regime switching	17
3.3 Data	18

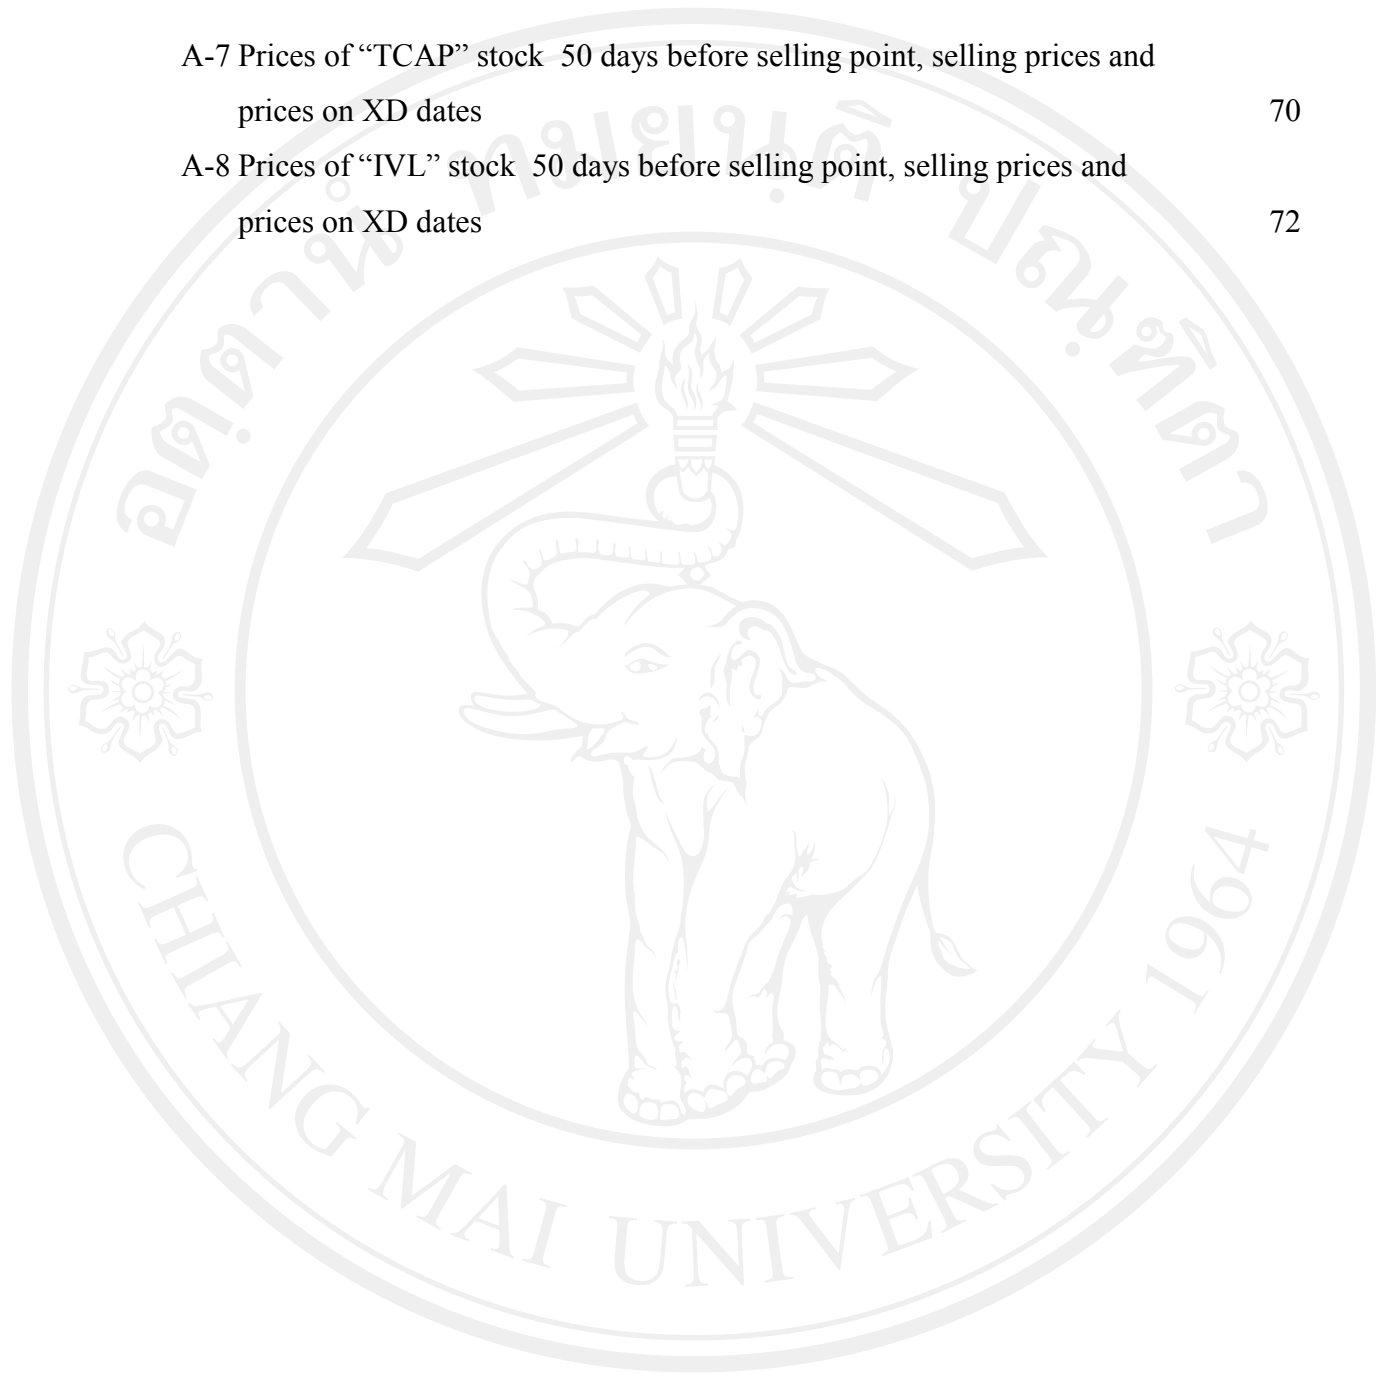

Chapter 4 Results	
4.1 Buying strategies before XD dates in the whole year	20
4.2 Sensitivity analysis of random selection	25
4.3 Sensitivity analysis of mutation rate	27
4.4 Buying strategy with zero mutation rate	32
4.5 Comparison between XD dates in the first and second half of the year	37
Chapter 5 Discussions and conclusions	
5.1 Discussions	48
5.1.1 Comparison between positive and zero mutation rate	48
5.1.2 Comparison between XD dates in the first and second half of the year	48
5.1.3 Comparison between 30, 40 and 50 days before the selling point	49
5.1.4 Best buying strategy of each stock	49
5.1.5 Performance of genetic algorithm for detection of regime switching	51
5.2 Conclusions	52
References	53
Appendices	
Appendix A Data	56
Appendix B Matlab source codes	75
Appendix B-1: Genetic algorithm for detection of regime switching	75
Appendix B-2: Out-of-sample tests	95
Curriculum Vitae	98

List of Tables

Table	Page
1 List of stocks in the study	18
2 Best strategy for buying stocks before XD dates in the whole year	21
3 Concentration of regime switching before XD dates in the whole year	22
4 Profit of the best strategy (whole year) when applied to out-of-sample observations	22
5 Profit when buying at the known lowest price (whole year)	23
6 Comparison of the profit from genetic algorithm and the real data (whole year)	24
7 Sensitivity analysis of random selection	26
8 Sensitivity analysis of mutation rates for IVL 50 days before XD dates in May 2011	27
9 Sensitivity analysis of mutation rates for CPF 50 days before XD dates in August 2006	29
10 Sensitivity analysis of mutation rates for CPF 50 days before XD dates in April 2011	31
11 Best strategy for buying stocks before XD dates with zero mutation rate using zero mutation rate (whole year)	32
12 Concentration of regime switching before XD dates in the whole year in case of zero mutation rate	33
13 Profit of the best strategy (whole year) with zero mutation rate when applied to out-of-sample observations	34
14 Profit when buying at the known lowest price (whole year)	35
15 Comparison of the profit from genetic algorithm and the real data (whole year) in case of zero mutation rate	36
16 Best strategy for buying stocks before XD dates in the first half of the year using zero mutation rate	38

17	Concentration of regime switching before XD dates in the first half of the year in case of zero mutation rate	39
18	Profit of the best strategy (first half of the year) with zero mutation rate when applied to out-of-sample observations	39
19	Profit when buying at the known lowest price (first half of the year)	40
20	Comparison of the profit from genetic algorithm and the real data (first half of the year) with zero mutation rate	42
21	Best strategy for buying stocks before XD dates in the second half of the year using zero mutation rate	43
22	Concentration of regime switching before XD dates in the second half of the year with zero mutation rate	44
23	Profit of the best strategy (second half of the year) with zero mutation rate when applied to out-of-sample observations	45
24	Profit when buying at the known lowest price (second half of the year)	45
25	Comparison of the profit from genetic algorithm and the real data (second half of the year) with zero mutation rate	47
26	Average Buying time and average rate of return	50
27	Summary of best strategies for buying stocks before XD dates in the first half of the year	51
A-1	Prices of “ADVANC” stock 50 days before selling point, selling prices and prices on XD dates	56
A-2	Prices of “CPALL” stock 50 days before selling point, selling prices and prices on XD dates	58
A-3	Prices of “CPF” stock 50 days before selling point, selling prices and prices on XD dates	60
A-4	Prices of “KBANK” stock 50 days before selling point, selling prices and prices on XD dates	63
A-5	Prices of “PTT” stock 50 days before selling point, selling prices and prices on XD dates	65
A-6	Prices of “SCC” stock 50 days before selling point, selling prices and prices on XD dates	67

A-7 Prices of “TCAP” stock 50 days before selling point, selling prices and prices on XD dates	70
A-8 Prices of “IVL” stock 50 days before selling point, selling prices and prices on XD dates	72

List of Figures

Figure	Page
1 Classification of regime switching and other types of change	7
2 Single change point	8
3 Multiple change points	8
4 A father who has information of 30 days	12
5 A mother who has information of 30 days	13
6 Parents who have information of 30 days from the first family	13
7 Parents who have information of 30 days from the second family	13
8 Parents who have information of 30 days from the third family	13
9 Parents who have information of 30 days from the fourth family	13
10 Crossing over process with the randomized number of 0.5	14
11 Mutation process with the mutation rate of 0.3	14
12 The process of genetic algorithm in finding the best solution	16
13 The process to find best of the best solution	17
