ACKNOWLEDGEMENTS

I would like to express my gratitude to all those who gave me the possibility to complete my study and this thesis.

My deepest gratitude goes first and foremost to Lect.Dr.Prapatchon Jariyapan, my dedicated supervisor, for his constant encouragement and guidance. His patience and kindness are greatly appreciated. Without his consistent and illuminating instruction, this thesis could not have reached its present form.

I would like to express my thanks to Asst.Prof.Dr.Piyaluk Buddhawongsa for her insightful comments and suggestions. Special thanks go to Lect.Dr.Chaiwat Nimanussornkul who had provided guidance on the econometric analyses.

My sincere thanks also go to all the staffs at the Faculty of Economics who had guided and helped me during my study and thesis completion.

I also owe my sincere gratitude to my friends and fellow classmates who gave me their advice and encouragement for both studying and living in Thailand.

Last but not least, my thanks would go to my beloved parents and sister for their loving considerations and great confidence in me all through these years.

Xianghong Cao
