ACKNOWLEDGMENTS

I would like to acknowledge the Ministry of Education for providing good opportunity and scholarship for my graduate study. This grant highly supports my dissertation and new knowledge.

I am grateful to the Faculty of Veterinary Medicine for supporting the facilities to carry out my thesis research and my thesis and providing many facilities to support my laboratory techniques.

I would like to express my sincere gratitude and deep appreciation to Assoc. Prof. Dr. Pawin Padungtod, my major advisor for his warm guidance, invaluable advices, supervision and encouragement throughout this thesis project. I am equally grateful to Prof. Dr. Niwat Maneekarn and Dr. Wiwat Chunruksa, my co-advisor for his valuable comments, advices, supervision and encouragement throughout this thesis project. They were never lacking in kindness and support.

I would like to thank Mr. Niwat, manager of Payao Agrotech farm who gave me an opportunity to do my research on his swine farm.

I would like to thank all staff in Swine clinic, Food animal clinic, Faculty of Veterinary Medicine, Chiang Mai University for their helping, many suggestions and friendship. I also thank 5th generation of Veterinary students of the Faculty of Veterinary Medicine, Chiang Mai University for their helping.

Finally, I would like to express my gratitude and deepest appreciation to my family for love, attention, understanding and encouragement which never been forgotten. And also sincerely thanks to my friends, who always encourage me in this study.
