ACKNOWLEDGEMENT

Grateful acknowledgement is made to many persons who were invaluable in helping me complete my doctoral studies. My sincere appreciation is extend to my major advisor, Associate Professor Dr. Wipada Kunaviktikul, Co-advisors, Associate Professor Dr. Ratanawadee Chontawan, Lecturer Dr. Thanee Kaewthummanukul and Associate Professor Dr. Karin Olson, for their scholarly guidance, recommendations, encouragement, support and enthusiasm during my studies at the Faculty of Nursing, Chiang Mai University and at the Faculty of Nursing, University of Alberta, Canada and the work of this dissertation. They always gave me prompt and valuable feedback and meaningful suggestions, encouraged me think deeply, and supported and helped me solve many problems.

I am sincerely and deeply grateful to Professor Dr. Lynn Skillen, Associate Professor Dr. Sujitra Tiansawad, and Associate Professor Dr. Tipaporn Wonghongkul for their intellectual advice, scholarly and meaningful recommendations, kind help and the valuable supports.

My special gratitude goes to the experts who are from the Faculty of Nursing, University of Alberta, the School of Nursing and the Huaxi hospital, SiChuan University for their valuable supports during testing the content validity of instruments.

I am especially thankful to faculty in Chiang Mai University who helped me maintain perspective, challenged and encouraged me throughout all my doctoral

study. Their support and affirmation contributed greatly to my optimism, perseverance, and success.

I wish to give impressive acknowledgement to the funding from Faculty of Nursing, Chiang Mai University provided by the China Medical Board of New York. I am deeply grateful to the Nursing Service Departments and the Directors of sample hospitals in Chengdu city, for their understanding and encouragement of my efforts, as well as their support and help during the data collection. My sincere thanks go to the nurses who agreed to participate in this study. I also want to acknowledge my colleagues in my doctoral cohort for the wonderful friendship, supports and kind help. Finally, I am profoundly grateful to my family whose unwavering love and trust lifted me up throughout my doctoral study. Mr. Qiu Changjian (my husband), Miss. Qiu Fangxinrui (my daughter), and my parents were always confident that I would reach my goal. Thank you very much for your love and understanding.

Fang Jinbo
